EXOTIC FRUITS

WHY BUY TROPICAL FOOD COMPANY?

Colombian fruits have excellent quality in organoleptic terms with one of the best colors, flavors, aromas, soluble content and BRIX value, when compared to products from other countries in the subtropical region.

Due to its condition as a tropical country located in the equatorial zone, the national territory benefits from permanent light, which allows fruit trees to be harvested throughout the year.

PRODUCT PORTAFOLIO

The fruit sector in Colombia benefits from the great diversity of topographical zones and climatic zones, which allow for harvests throughout the year. Colombian fresh fruit production grew 20.6% in the last 5 years, reaching 7.3 million tons in 2023.

Products with SGS, BASC, ISO, SGF, HACCP, Organic, Kosher certifications, among others.

FLOWERS

WHY BUY TROPICAL FOOD COMPANY?

In the world, Colombia ranks as the second exporter of flowers, the first exporter of carnations and the main supplier of the United States.

It is a sector with a high social impact, since it generates more than 140,000 direct and indirect jobs in 60 Colombian municipalities and involves around 25% of the country's formal female rural workforce.

Colombia is one of the countries with the greatest diversity of flowers in the world, exporting 1,400 varieties.

PRODUCT PORTAFOLIO

The production of the Colombian flower has become one of the largest generators of rural formal employment in the country, since for each cultivated hectare 17 jobs are generated.
