Our Vision

Emit Knowledge, research and product development company, utilize knowledge, creativity and the right set of technologies to provide your business with progressive solutions.

Driven by our core values: "People, Products, Quality", we've envisioned a company whose main purpose is to research and deliver high quality products and software solutions that we are proud of.

Our Products

As a startup company we believe that products shapes the world. As such, we take a small place in the startup realm with the products that we've developed. Encouraged by our ideas and expertise we've developed several products that serve businesses around the world in their day to day operations.

Envoice is professional invoicing application for freelancers, contractors and small size companies.

Enable collaboration within your team! Socialspot encourages team members to share their individual knowledge and experience comfortably, in a familiar, and yet professional setting.

A screenshot of the Socialspot web application interface. The interface has a light grey header with the Socialspot logo, a search bar, and user navigation links (Feedback, sasho, profile, and a power button). A yellow banner below the header says "Click to organize your data more efficiently". On the left is a vertical sidebar with icons and labels for HOME, GROUPS, QA, COLLEAGUES, CONTACTS, APPS, and PROFILE. The main content area is divided into three sections. The top section is a post creation box with a "Post" button and tabs for "Announcement" and "Question", containing a text input field with the placeholder "Share some updates with the team". The middle section shows a post by user "sasho" dated "15/01/2014" with tags "sales" and "Managment". The post text reads "Discover 7 Ways to Build Profitable Social Media Marketing Service! Social Media Marketing is one of the most hotly out...". Below the text is a video thumbnail titled "Social Media Marketing 2013 Webinar" with the subtitle "Social Media Marketing webinar - video". At the bottom of the post are like and comment icons (1 like, 4 comments) and a "Write comment..." input field. The right sidebar contains two panels: "Group info" for "Sales&Marketing" showing a bar chart icon, member avatars, and options to "Requesting members (0)" and "Invite and manage members"; and "Documents" showing a document icon and a file named "CH-Sales-Representative-manual.doc".

Spark is a planetary explorer and encyclopedia with dreams of becoming a live encyclopedia for any planetary objects.

Sending emails using MvcMailer
MvcMailer is an interesting component that you can use for sending emails in ASP.NET MVC Framework. The very great thing is that it uses Razor view engine views as email templates and is pretty easy to setup and use. In this article you will see how to install it, setup email templates and send emails...

1. INSTALLATION

- First of all, create new ASP.NET MVC project (or use one you are already developing...)
- The next thing is to install the component. The component can be installed using NuGet Package Manager (PowerShell console or NuGet Packages Dialog) or you can get the source code directly from the Github repository [here](#).

Dedicated To Deliver

We are responsible for bridging our knowledge and expertise with technology to deliver. Dedication and high quality are not only written words, we live by the codex to deliver with elegance and exceed customer expectations.

Our Clients

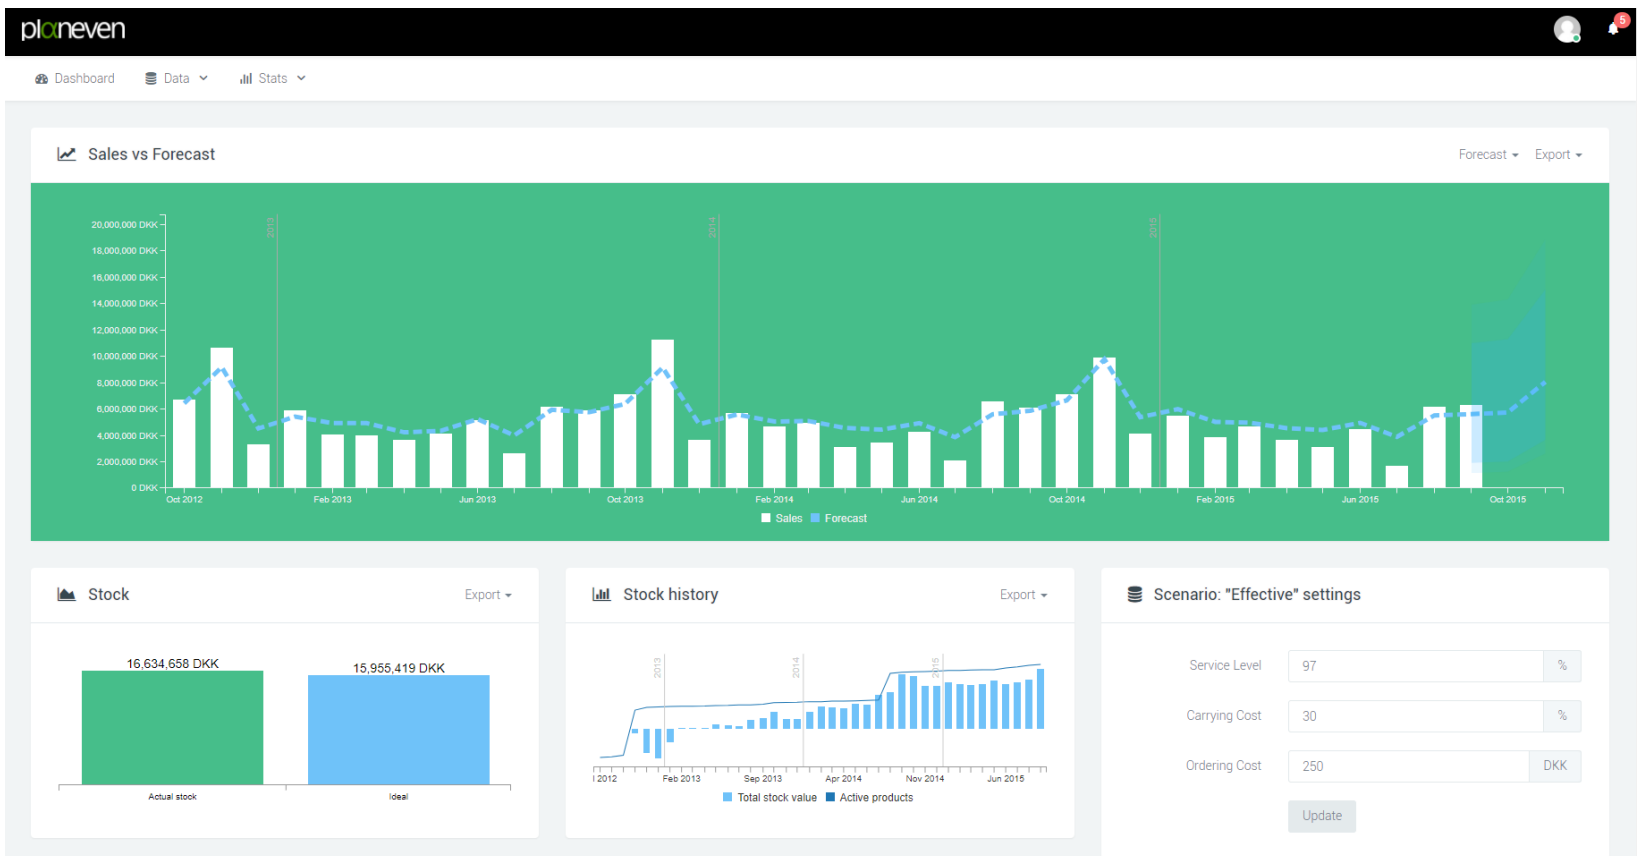

"A picture is worth a thousand words"

We earn our clients trust with our professionalism and dedication.

Our core value to always deliver with best quality is highly respected among our clients. Take some time to dive into the wonderful work of art products that we've developed for our clients.

Planeven is low cost planning tool that increases the planning skills in the company, reduces cost and increases the service level.

Stage Clip enable event organizers and videographers to instantly create and distribute personalized video clips of their attendees in mass participation events. StageClips are immediately available for consumers to download to their mobile devices and share instantly on social media.

A screenshot of the Stage Clip web application interface. The interface is divided into three main sections: a left sidebar, a central video player, and a right-hand panel. The sidebar, titled "EVENTS", contains a link to "Events". The central video player shows a live or recorded video of a group of people in academic regalia on a stage. Below the video is a progress bar with a play button, a "Person name" input field containing "sa", and a "Cancel" button. The right-hand panel, titled "Video clips", lists six video parts, each with a "processing" or "pending" status and a time range. The top of the right panel has tabs for "People" and "Video clips".

Integration with MatLab should have been easy? Yes, we've made it!
We've helped the client to load big CSV data files into MatLab (1GB>=).
They can now safely run their simulation processes.

Trackado is an effective contract management software used for tracking contract details, events, due dates and related documents.

The screenshot displays the Trackado dashboard interface. On the left is a dark sidebar with navigation links: Dashboard, Contracts, Overview, List by Status, Active, Pending, Terminated/Expired, Archived, Draft, All, Add Contract, Events, and Business Partners. The main area features six summary cards at the top:

- Amount of Contracts**: 46
- Revenues the Next 12 Months**: \$91774
- Cost the Next 12 Months**: \$220546
- Upcoming Events**: 2
- Overdue and Not Dismissed Reminders**: 4
- Events with Other Reminders**: 6

Below these is a large section titled "Calendar". It includes a date range selector set from April 2016 to September 2016. A monthly calendar grid shows dates from April to September. At the bottom of the calendar view is a detailed table listing events.

Title	Date	Type	Reminder Date	Contract	Business Partner
Contract agreement	Apr 02, 2016	Start date	Apr 02, 2016	Iest contract	Widget Corp
Marketing Agency	Mar 16, 2016	Start date	Apr 07, 2016	Marketing Agency	Acme, Inc.

CTTC is a job marketplace where in-demand candidates are matched with offers from great companies looking to hire.

Testimonials

“ Not only are these guys extremely talented and hard-working full-stack developers, but a great devil’s advocate for your product’s technology strategy going further.

We are not going to let go of them but if they grow to take on more business, I can personally vouch on their team’s capability and commitment. ”

Ripul, S(u)ave

“ This has been one of very little projects within the Fokker organization that has run very smooth, has shown excellence in collaboration while defining, developing and implementing the Commercial Excellence portal. ”

Fokker Technologies board of directors

Testimonials

“ This first impression was confirmed during the development phase as they continued to deliver as promised and made the development project a success. Even if we hit bumps on the road, as you always do in this kind of projects, they had a very proactive approach and came up with outside-the-box solutions, which ultimately made the application better than originally specified ”

Mark Zeise,
Founder of Trackado

“ Your knowledge of developing software applications, from a business perspective, is of a high-class standard. I have never experienced software to be developed with only a few number of minor bugs that can be resolved within just a few hours delivering a high-quality product. ”

André Mulder,
Mulder ICT Solutions BV
Close to the Crowd BV

Community contribution

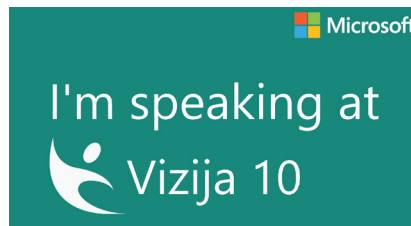

As part of our team philosophy to build better software together, we always give back to the community. Our team is actively contributing in open source projects, public speaking, lecturing, blog writing and supporting our local user groups.
