

SPORTS REARSETS

SPORTS REARSETS

COMPRAR

Bullet sports rearsets were developed to optimize the interaction between rider and motorcycle, allowing positioning adjustments.

They have height and setback adjustments for the feet, horizontal adjustments for the brake and gearbox actuation treads, bearings in the pedal articulation, a high-precision labeled system for articulating the gearshift rod and textured treads. In this way, we provide precision when engaging gears, sensitivity when activating the brake system, grip of the feet on the tread, as well as mechanical resistance and durability.

The entire set is made of special aluminum alloy with high mechanical resistance.

As this is equipment intended for sports use, the pedals do not have a brake light activation system. Adaptations are possible for some models. Consult us.

CLIP-ON HANDLEBARS

 $\bullet \bullet \bullet \bullet \bullet$

CLIP-ON HANDLEBARS

COMPRAR

Bullet Clip-on Handlebars were developed to replace original handlebars on motorcycles, both sports and other models, and allow the professional or amateur rider an ideal ergonomic posture for motorbikes. On some motorcycle models, alterations may be necessary for installation.

The fixing clamps allow quick installation and the bars are independent pieces, for easy replacement in the event of a fall. This way, we guarantee savings for consumers and competitiveness for pilots.

Clip-on Handlebar GP Model

Up to Ø47mm 550.00BRL - Above Ø48mm 590.00BRL

Consult us about your model.

The GP model was developed for professional use on tracks, meeting strict performance requirements in motorbike competitions. These have a system of reinforced clamps made of a special aluminum alloy with very high mechanical resistance, the same used in components for world championship motorcycles, such as WSBK and Moto GP. The bars have a spherical finish at the ends, made of engineering plastic, the same material as our sliders.

Clip-on Handlebar GP2 Model - 660,00BRL

The GP2 model meets the needs of some motorcycles where it is necessary to deflect the top triple tree. See table below.

Clip-on Handlebar GP3 Model – From 795.00BRL to 960.00BRL

The GP3 model was developed with a slight elevation and positioning lateral to the bike's table. The other models are positioned in front of the table.

Clip-on Handlebar UP Model - 610,00BRL

On some motorcycles, it is not possible to replace the original handlebars with GP model handlebars, due to their interference with steering, as they can touch the tank, fairing, etc. That's why we developed an intermediate-post clip-on handlebar system. The Up Model Clip-on, not as low as the GP model, but lower than the original, provides the rider with a more sporty stance. The clamps are made of high-resistance aluminum and the bars are made of solid aluminum with M6 thread for attaching the Bullet handlebar terminals or the bike's original handlebars.

Replacement bars - mod. GP 95.00BRL each and mod. UP 100.00BRL each

If it is necessary to replace the bars on your Bullet handlebars, you can purchase a new part and replace it simply and quickly.

See the model for your motorcycle

All motorcycle models, especially sports ones, can receive a clip-on handlebar. However, some motorcycle models may require adaptations to allow installation (see * in the table). If you do not find your motorcycle model in the list, contact us for more information.

FRAME SLIDERS

FRAME SLIDERS

BUY

The Bullet frame slider systems have their structure made of a special aluminum alloy and the impact terminals are made of engineering plastic with a low coefficient of friction. The system is fixed to the motorcycle frame using tempered steel screws.

This system was designed to reduce the impact and points of contact of the motorcycle with the ground in cases of falls common in sports riding on racetracks. Sliders help minimize or prevent frame misalignment and frictional wear to fairings, engine covers, chassis and other parts as the vehicle slides along the track.

Frame Slider mod. Standard – 445,00BRL

This model was developed for motorcycles that allow direct installation of the part and with 1 single fixing point.

Frame Sliders mod. Standard 2 - R\$470,00

In this model, an axle runs through the motorcycle frame to attach the sliders to the ends.

Frame Sliders Chassi mod. with base plates - R\$ 495,00

This model was developed for motorcycles in which access to the mounting point is indirect. In these cases, a support is necessary to fix the impact terminals, avoiding the fairings.

Frame Sliders Chassi mod. with base plates Type 2 – R\$575,00

Some motorcycles require special models that may feature double mounting or a special deflection. Check the table below and contact us.

AXLE SLIDERS

AXLE SLIDERS

COMPRAR

Axle Sliders - 240.00BRL each pair (front or rear)

This slider system is installed on the front and/or rear wheel axle.

The function of the pair for the front wheel is to protect the tips of the front forks and complement the action of the frame sliders, providing another support point on the bike in the event of a fall. The

rear wheel axle sliders protect the tip of the swingarm, in some situations, complement the action of the other sliders.

Axle Sliders with spools – 270.00BRL each pair (front or rear)

This system, in addition to the protection function described above, also allows the use of stands to suspend the motorcycle by the front or rear axle. Its difference is its use on motorcycles that do not have mounting points for spools guides on the swingarm and on motorcycles with single-arm type swingarm, which would require a special spool.

SWINGARM SPOOLS

SWINGARM SPOOLS

COMPRAR

Bullet Swingarm Spools are attached to the motorcycle's swingarm using stainless steel screws. This system serves as a hitch point for the rear stand and also, in some cases of falls, acts as a slider system preventing the swing arm from touching the ground.

Model available

SBK M6 M8 or M10 – 210,00BRL

The aluminum base is removable, making it possible to install it in two ways according to the pilot's preference.

For installation, the motorcycle must have a point on the swingarm to attach the system. We make the

product available in versions with M6, M8 or M10 screws to be specified according to the model and year of the motorcycle.

+55 (11) 4220-2207 +55 (11) 9 5053-7087 Monday to Thursday from 8am to 6pm, Fridays from 8am to 5pm. sac@bulletmoto.com

BRAKE LEVER GUARD

BRAKE LEVER GUARD

COMPRAR

The Bullet Moto Brake Lever Guard is made up of 2 parts to offer both resistance to falls and safety for the rider.

The support is made of high-resistance aluminum and is attached externally to the semi-handlebar bar, being a universal product that allows the use of handlebar terminals and weights, depending on your preference. The external part is plastic, like our sliders, providing protection to the lever.

The function of this product is to prevent the brake from being applied in the event of an accident or collision with another motorcycle. This type of equipment became mandatory in 2016 in international motorbike competitions as determined by the FIM – International Motorcycling Federation.

Plastic Terminal – 110.00BRL

Universal product. Colors: black or silver with black. Brake side only.

Please observe the criteria below for compatibility: - Handlebar diameter: 7/8"

- Available space between the handlebar and the tip of the handlebar bar: 11.5mm (this is the space that the part occupies on the handlebar bar)

If there is not enough space on your bar, adaptations are possible. Consult us before purchasing.

SPORTS CHAIN PROTECTOR

SPORTS CHAIN PROTECTOR

Keel type model. Universal product. Available in black color

For installation, 2 holes with M6 thread are required under the swingarm. Some motorcycle models already have this drilling from the factory. Check the need for drilling. The installation position can be adapted according to your preference.

+55 (11) 4220-2207 +55 (11) 9 5053-7087 Monday to Thursday from 8am to 6pm, Fridays from 8am to 5pm. sac@bulletmoto.com

BAR-ENDS

●●●● BAR-ENDS

COMPRAR

Our bar-ends can be used in conjunction with Bullet clip-on handlebars or others available on the market. On original handlebars, some adaptation may be necessary to secure them. Consult us.

These bar-ends add weight to the ends of the handlebars, contributing to stabilizing the front of the bike in reactions such as shimming and reducing vibration in the bars. The engineering plastic tip, the same as our sliders, reduces the transfer of impact to the bike in the event of a fall. This product combines great functionality and refined aesthetics.

Bar-ends Slider model - 160.00BRL

The Slider model bar-ends have the function of finishing and protecting your handlebars. Its body is made of engineering plastic, like our chassis and axle sliders, which helps the bike to glide in the event of a fall and protects the handlebars, as it contributes to less impact transfer. The aluminum base can be in the following colors: natural aluminum, black, gold, red or blue.
