

FCX

Experts in Foreign Trade Facilitation

FCX is a specialized firm that focuses on facilitating international trade operations. With an experience team, we provide efficient and secure import and export services to assist companies in navigating customs and legal processes.

Enhancing Your Supply Chain with Origin Inspection and Quality Assurance

At FCX Foreign Trade Facilitators, we understand the critical importance of ensuring the quality and integrity of your shipments from the very start. Our comprehensive suite of origin inspection and quality assurance services is designed to provide you with unparalleled visibility, control, and peace of mind throughout your global supply chain operations.

by Jorge Lopez

Comprehensive Container Inspection

1

Container Condition

Our team conducts a thorough visual inspection of the general condition of the shipping container, checking for any signs of damage or irregularities that could impact the integrity of your goods.

2

Loading Validation

We ensure that the loading of the merchandise is carried out in an orderly manner, in accordance with the shipping documents, invoice, and packing list, verifying the quantity, quality, brands, and labeling.

3

Customs Clearance Optimization

By conducting this inspection at the origin, we can reduce customs clearance time in Mexico from 24 to 48 hours, significantly expediting the import process and minimizing delays.

Detailed Cargo Inspection

Packaging Verification

Our cargo inspection process involves a thorough examination of the packaging of the merchandise, ensuring it meets the required standards and regulations.

Quantity Confirmation

We carefully count the number of packages to confirm the exact quantities loaded into the container, providing our clients with greater visibility and transparency.

Condition Assessment

Our team assesses the general condition of the container and its contents, allowing us to anticipate any potential issues and take proactive measures to address them.

Rigorous Quality Inspection

1

Random Sampling

We conduct random sampling of the order according to ISO 2859 standards, ensuring a statistically significant representation of the product quality.

2

Defect Categorization

Any identified quality defects are carefully categorized, and corrective actions are implemented with the supplier to prevent recurrence.

3

Final Inspection

The balance of the purchase order may undergo a final quality inspection, providing our clients with the assurance of consistent and reliable product quality.

Arrival Inspection for Perishable Goods

Container Condition

Our team closely examines the physical condition of the container, documenting the packaging and conducting a qualitative analysis of the product quality, including size, color, defects, and temperature.

Supplier-Client Facilitation

We facilitate negotiations between the client and the supplier, preventing potential misunderstandings and providing detailed reports on the condition of the merchandise upon arrival.

Warranty Support

Our arrival inspection services extend to on-site information and support in enforcing warranty policies, ensuring the seamless resolution of any issues that may arise.

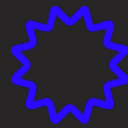

Supplier Audits for Assured Quality

Facility Assessment

We conduct on-site visits to the manufacturer's facilities to ensure they exist, are properly registered, and have the necessary infrastructure to produce the goods.

Documentation Validation

We thoroughly review the supplier's documentation, including quality certificates, company registration, import/export licenses, and banking records to ensure authenticity.

Production Processes

Our team validates the supplier's production processes and compliance with the required quality certifications, guaranteeing the delivery of high-quality products.

Comprehensive Purchasing Management

1

Contract Negotiation

We engage in the entire purchasing process, from negotiating the contract to placing the purchase order and ensuring the supplier meets the agreed-upon quality and timelines.

2

Production Monitoring

Our team closely monitors the production process, verifying the quality of the goods and overseeing the loading of the merchandise to prevent any shortages or issues.

3

Post-Purchase Support

We maintain continuous communication with the supplier to address any issues that may arise during or after the purchase, ensuring a seamless and successful transaction.
