Your own personal climate
has now become a reality

Evaporative air coolers is a combination of efficiency and simplicity

Much better than a fan, more energy efficient than AC.

About Evapolar

Evapolar is a manufacturer and international vendor of microclimate devices. It was founded in 2015 to challenge the air treatment industry by introducing a personalized approach for creating a comfortable environment.

7 years on the market

1 million units sold

100+ wholesale partners

Evapolar Infrastructure

**Available all
over the world**

7 warehouses

California, New Jersey,
Germany, Hong Kong,
UK, Australia, Russia

2 manufacturing facilities

Chinese facility is among top 10
biggest assembly factories
in China.

Tax Payer

Evapolar group is a registered
tax payer in 5 countries: UK,
Germany, Russia, Cyprus, USA

4 offices

US, Russia,
Cyprus,
China

Ultimate comfort is now at your fingertips

Cools

Uses natural evaporative cooling effect to drop air temperature around you by 4 – 17 °C

Humidifies

Humidifies the air creating better environment

Purifies

Filters out dust particles to increase air quality for better breathing

Our main products are the 3 models of personal air coolers

Press about Evapolar

evapolar

**The
Guardian**

The Evapolar is the most effective evaporative cooling system I've used, managing to take the temperature down by as much as 6 °C even in the humid heat.

Forbes

Evapolar is a 'Personal Air Cooler' that can drop the temperature around you by 4-17°C only using 10w of electricity.

TNW

The Evapolar is a gorgeous piece of kit. It looks decidedly premium, and it's pretty economical to run.

**BUSINESS
INSIDER**

This tiny air conditioning unit is surprisingly effective — and it's helping me keep my electric bill down this summer.

How it works

evapolar

Fill the water tank

Plug it

Press the button

Enjoy

Innovative EvaBreeze® Technology

evapolar

It took 20 years and 1.5 million USD investment to develop EvaBreeze® material.

The unprecedented technology has unique composition and made from basalt, a rock-solid material from volcanic lava. The non-organic membrane prevents the bacteria and mold from spreading, and does not lose its absorbing capacity over time. Taking a breather has never been healthier!

Safe

100% inorganic,
prevents bacteria
and mold spreading

Nano-thin porous structure

Huge surface for water
evaporation and powerful
cooling effect

Biodegradable

Natural basalt fibers
made from volcanic lava

Laboratory test shows us the difference between Evapolar and similar device while the human eyes can't see it

Similar device cartridge (cellulose technology)

Inhaling or touching mold spores can cause cough and serious allergic reactions, including sneezing, skin rash, red eyes and runny nose. People with mold allergies may have more severe reactions, including shortness of breath.

Evapolar's cartridge (our EvaBreeze® technology)

evaBreeze® material stays almost sterile even after 31 days of use.

Key features

evapolar

Natural cooling effect

Emulates a soft natural chilling process.
Reaches full cooling power within 5-10 minutes

Ultraportable & USB powered

Compact and light-weight. Works on USB power supply

Energy and cost efficient

Consumes only 7.5W \approx 100 times less power than standard split systems

Absolutely eco-friendly

No toxic Freon-like liquids

Whisper quiet

No noise as from regular air-conditioner

Award winning design

Stylish and minimalist design to match your interior
