

Labacorp Power Company

Labacorp Power Company is an independent power producer and renewable energy development company that specializes in the facilitation, development, and operating of sustainable power generation projects in Africa with a growing portfolio of projects. Through its subsidiaries, the company provides solar energy solutions and services to residential, commercial & industrial power users in Africa, and engage in product distribution, and project financing.

Labacorp Power Company conducts a wide spectrum of activities in the power generation industries through its subsidiaries and affiliates. We have an ongoing relationship with groups of investors looking to invest in renewable energy projects in Africa (solar, wind or hydropower), and work with project developers looking for equity partners.

We also work with international renewable energy projects that typically generate either international renewable energy certificates (I-RECs), clean energy certificates (CECs), or carbon credits using one of the main voluntary carbon standards (e.g. Gold Standard, VCS, CDM). We showcase the projects to our partners that have interests in purchasing I-RECs, CECs, or carbon credits when they have demand by their clients.

OUR POWER GENERATION SOLUTIONS

Solar Power

Hydroelectric Power

Biomass Power

Wind Power

Natural Gas Power

SERVICES

Labacorp Power provides services in development, design, construction, ownership, and management of power generation projects. We provide the following services through our highly experienced multinational team.

Project Origination

Client's expectation
Market conditions and competitors
Project goals

Feasibility Analysis

Risk analysis
Preparation of tender documents
Due diligence

Project Facilitation

Management of the tender process
Project deliverables
Project schedule and cost
Presentations
Permit procurement

Project Development

Development support
Equity participant
Site selection
Project Development
Scope definition
Production forecasting
PPA bid support
Consortium partner
Turnkey design-and-build contractor
Operations and maintenance
Cost estimating & technology evaluation

We focus on all aspects of power generation from pre and full feasibility studies to project implementation; including power station conceptual design, planning and engineering of power transmission and distribution infrastructure and construction supervision. Our experience across the renewable energy solutions in Africa is unrivalled.
