Economic Dev.

Biofuels

We integrate three main objectives in our work: a healthy environment, economic profitability, and social and economic equity. We work to ensure a sustainable agricultural system.

“Stewardship of both natural and human resources is of prime importance. consideration of social responsibilities such as working and living conditions of laborers, the needs of rural communities, and consumer health and safety both in the present and the future, maintaining or enhancing this vital resource base for the long term” **Dr. Eduardo Christensen,**

Sustainable Agriculture

Oil palm in Central America, FGH`s first challenge was to work with smallholders to overcome the shortcomings related to good agricultural practices (Guajiquiro, Honduras)

Our approach is holistic, comprehensive, total perspective. This is our goal, we provide advice and consulting that range from surveys to planning and guidance to long-term management of the land, natural and cultural resources.

“Our staff has expertise in developing strategies focused on ecological, economic, and social sustainability based upon sound principles” **Dr. Tony Hinojosa, VP.**

Tropical Forestry

Tropical Forest Resilience Project. FGH's vision to restore, protect and maximize ecosystem production across Latin America in action. (El Peten, Guatemala)

Digital innovations and strengthening the management information system by enabling online real-time data collection, it can also be used for documentation and processing of research activities across scattered locations.

“FGH’s platform for M&E programs and training, as well as to centralize all data in a single repository, our value added” **Dr. Alfonso Larios, Sr. Director**

Traceability, Monitoring & Learning

Shaping Zucarmex’s sugarcane value chain, with new capacity tools for administrative, operations & field staff
(El Higo, Mexico)

Our main approaches to Wildlife Conservancy are: the wise use and the preservation of nature. The wise use approach aims to accommodate humanity's continuous use of wild nature as a resource for food, timber, and other raw materials, as well as for recreation.

”Wise use appeals to the interests of humans over time, the goal of Conservancy is to enhance and maintain nature's yield as a valuable resource for human beings” **Dr. Ernesto Enkerlin, Nature Chief Council**

Wildlife Conservancy

Sustainable Landscapes project, generating new opportunities for blended finance and impact investment for inclusive supply chains in palm oil, livestock and cocoa. (Rio Coca, Ecuador)

The Difference

Strategic planning

“out of the box” thinking,
fresh and new
perspectives

Long Term Vision

Unleashing the true
potential of all projects

Environmental Sustainability

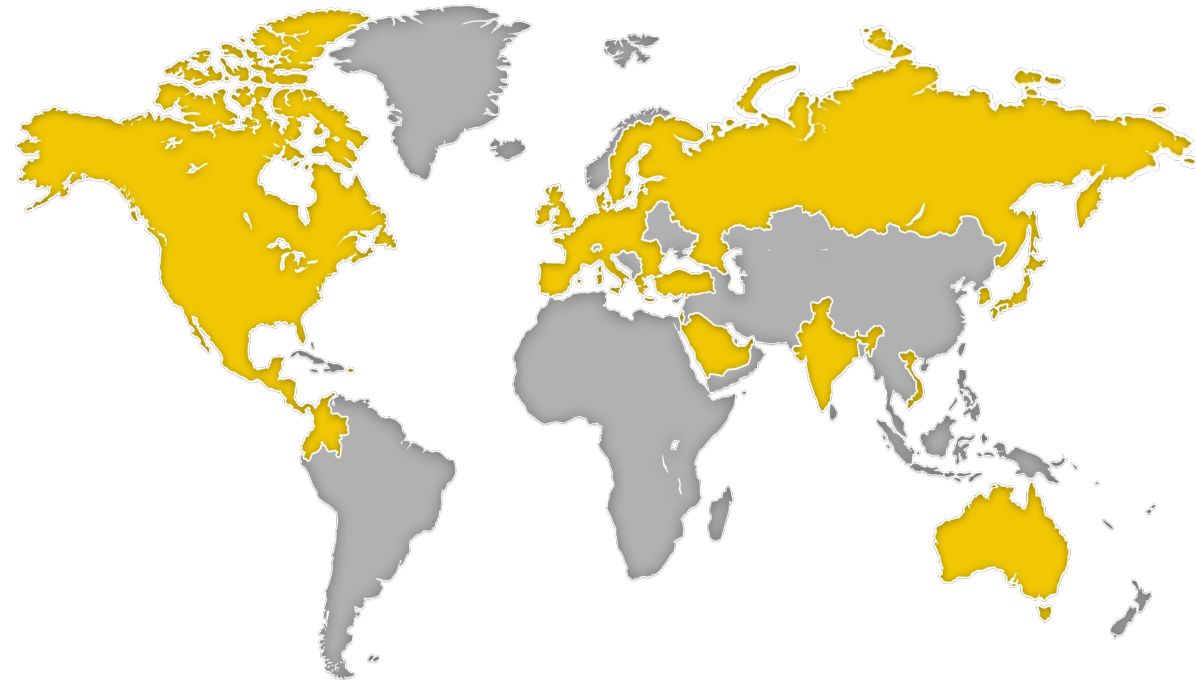

Comply with the high
quality and sustainability
standards

International Experience

Our clients
Our value

General Director:
Dr. Ernesto Enkerlin Hoeflich.

Link stakeholders vision with a
bioconservancy model.

A moral duty: to conserve the sheer
variety of life on earth.

Help our clients to minimize water,
biodiversity and carbon planetary
footprint and contribute to the Global
Reporting Initiative.

FGH Nature 2050 Vision Social Responsibility

General Director:
Javier Carrera Ruesga.

Help stakeholders vision to amplify the discourse on the state and the future of the world's many food systems, keeping awareness on fair trade, traceability and sustainability.

Empower small farmers and communities globally by developing new and stronger agricultural value chains with actionable solutions and become protagonists in their own food system future.

Bring together food systems actors that have not traditionally worked together

FGH Green 2050 Vision Social Responsibility
