## About Us

**“Bringing global solutions  
to your local needs”** <sup>TM</sup>

Established in 1991, FGH has led agroindustry projects across Latin America and the Caribbean.

Our multidisciplinary team of full-time engineers and PhDs brings over 25 years of experience, delivering integrated solutions across more than 300 agribusiness sectors.

We leverage an extensive network of agribusiness experts strategically located throughout the continent.

# Mission

- We provide corporate and public sector clients with an integrated approach to problem-solving, delivering a clear roadmap to their future.
- We seamlessly integrate research and analysis, marry policy and strategic planning with market-driven decision-making, and bridge finance and investment with capital raising.

# Values

## Sustainability

Strive to provide a sustainable business model that impacts positively in the economic, social and environmental areas

## Integrity

Commitment to ethics and respect the culture in the communities we are involved

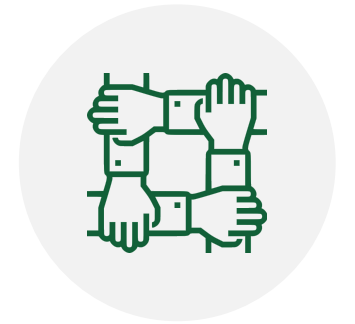

## Accountability

Take responsibility for our actions

## Excellence

Enhance excellence by providing the results with our business partners

## Collaboration

Collaborate with our business partners, stakeholders and community to reach our shared goals

Biofuels

Our mission is to build a sustainable agricultural system by balancing three core pillars: environmental health, economic profitability, and social equity.

"Stewardship of both natural and human resources is of paramount importance. We prioritize deep social responsibility—including the working and living conditions of laborers, the vital needs of rural communities, and long-term consumer health and safety—to protect and enhance our resource base for generations to come." **Dr. Eduardo Christensen,**

# Sustainable Agriculture

**Beginning with the oil palm sector in Central America, FGH's foundational challenge was partnering with smallholders to bridge gaps in good agricultural practices." (Guajiquiro, Honduras)**

We take a truly holistic approach to our work, offering comprehensive consulting and advice that spans from initial surveys and planning to the long-term management of land, natural, and cultural resources.

"Our team excels at developing strategies rooted in sound principles of ecological, economic, and social sustainability." **Dr. Tony Hinojosa, VP.**

# Tropical Forestry

**Tropical Forest Resilience Project: FGH's vision in action—restoring, protecting, and maximizing ecosystem productivity across Latin America. (El Peten, Guatemala)**

Through digital innovation, we strengthen management information systems by enabling real-time, online data collection. This unified platform also streamlines the documentation and processing of research activities across geographically dispersed locations.

"FGH's platform adds distinct value by streamlining M&E programs and training, while centralizing all critical data into a single, secure repository."

**Dr. Alfonso Larios, Sr. Director**

# Traceability, Monitoring & Learning

**Shaping Zucarmex's sugarcane value chain, with new capacity tools for administrative, operations & field staff**

**(El Higo, Mexico)**

Our approach to wildlife conservation balances sustainable use with environmental preservation. The sustainable use model accommodates humanity's continuous need for natural resources—such as food, timber, and raw materials—as well as recreation, while ensuring long-term ecological balance.

"The 'wise use' approach aligns with long-term human interests, aiming to enhance and maintain nature's yield as a sustainable, valuable resource for society." **Dr. Ernesto Enkerlin, Nature Chief Council**

# Wildlife Conservancy

**Sustainable Landscapes Project: Generating new opportunities for blended finance and impact investment to build inclusive supply chains across the palm oil, livestock, and cacao sectors. (Rio Coca, Ecuador)**

General Director:  
**Dr. Ernesto Enkerlin Hoeflich.**

## **Our Nature Vision 2050**

To pioneer global sustainability by balancing environmental health, economic profitability, and social equity, delivering a resilient and biodiverse future for the agribusiness sector.

## **Social Responsibility & Stakeholder Engagement**

We build inclusive supply chains by actively engaging stakeholders from local smallholders to global investors. Our commitment is rooted in social equity, championing fair labor conditions, and fostering thriving, resilient rural communities.

# FGH Nature

General Director:  
**Javier Carrera Ruesga.**

## **Our Green Vision 2050**

To pioneer global sustainability by harmonizing environmental preservation with economic viability, delivering a resilient, low-carbon future for the agribusiness sector.

## **Social Responsibility & Stakeholder Engagement**

We actively engage stakeholders—from local smallholders to global investors—to foster socio-economic equity, elevate worker welfare, and build thriving, inclusive rural communities.

# FGH Green

- Backed by over 30 years of international experience, our practice is deeply enriched by our work across diverse cultures, regulations, and global markets. This extensive background equips your project with the precise know-how needed to realize its full potential.
- Our client portfolio includes prominent multinationals, governments, private investors, financial institutions, and NGOs from around the globe. To date, we have successfully conducted business across North America, Latin America, Europe, the Middle East, and Asia.

# International Experience

Our clients  
Our value

# The Difference

## Strategic planning

“out of the box” thinking,  
fresh and new  
perspectives

## Long Term Vision

Unleashing the true  
potential of all projects

## Environmental Sustainability

Comply with the high  
quality and sustainability  
standards

# Thank You
