

Flow Director – Overview of Components

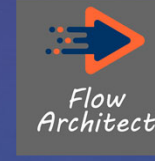

Focused Digital Workspace

Single “pane of glass” workspace based on an airplane’s cockpit – all views and tools in one place for efficiency

Embedded Blockchain

A blockchain “backbone” captures all transactions as well as key data in an immutable audit trail. Our platform can also handle crypto assets including a embedded sub-ledger and crypto-capable payment gateway.

CPI Enabled Process Automation Platform

Three modules linked together to allow a CPI cycle to drive continued improvement in all transaction processes

Enhanced Reporting and Data Insights

A data management suite using data lake, automated reporting, dashboards and BI data mining tools

Quality Control Assurance

Combines adaptive training, AI assistance and QC monitoring tools to allow rapid onboarding and make sure products and services conform to firm standards
