**40 YEARS OF EXPERIENCE
PRODUCING SOLUTIONS**

Customized Project Development

We work on customized projects for your needs, with the development of drawings and analysis of materials based on the application, in order to ensure the best outcome for your use.

Technology in Parts Manufacturing

Always pursuing innovation, our production line is constantly updated with advanced industrial manufacturing equipment and techniques, using cutting-edge technology in management, development, manufacturing, and inspection.

Specialized Service

A trained team with full technical knowledge will assist you when placing your order, ensuring that your questions are answered promptly on the first contact.

ABOUT US

Founded in 1982 under the name Enfer, our goal has always been to deliver the best customer service and precision machining services. With technology and innovation in the industrial sector, we stand out for our constant evolution in the manufacturing of parts for the agricultural and off-road industries, delivering high-quality products to our customers, recognized by consumers and strengthening our brand both nationally and internationally.

WHY DIVERSA?

We have high production capacity with specialized labor, delivering the best results in precision machining manufacturing products and services to our clients.

- We manufacture parts based on drawings or samples.
- Detailed engineering projects for machines and equipment.
- Availability in the production of small to large batches of parts.
- We ship with agility to all regions of Brazil and the world.

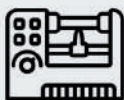

Excellence Capacity Commitment

We have more than 70 employees dedicated daily to delivering orders.

Project

We have a team of qualified engineers to develop and monitor production at every stage of the manufacturing process, in order to ensure that all requirements are met within the specifications that the project requires, for each new batch produced.

Development

Qualified technicians operate computerized CNC machines, which automate the production process precisely and speed up the manufacturing process in order to increase quality and decrease manufacturing time.

Quality Control

At each critical stage of production or finishing, the batches go through our quality control, which certifies that everything is within the expected parameters, before being carefully packed with anti-corrosion protection and dispatched to our customers.

PROCESS

The formation of the internal processes implemented was based on years of study and improvement that now encompass effective methodologies that bring agility and consistency to all stages of production.

RESOURCES

- ✓ Automated machines with CNC technology.
- ✓ Precision computerized machining center.
- ✓ Milling machines and keyseaters.
- ✓ Manual and robotic mechanical lathes.
- ✓ Sheet metal, oxy-fuel cutting and welding complete the stages.

Off-Road

We produce original replacement parts for 4x4 Jeeps and Pick-ups, with the quality and specifications demanded by manufacturers, ensuring a long and durable lifespan. For challenging and adverse terrains, check out our Performance line.

Agricultural

We have the most complete line of agricultural products on the market, with over 5,000 cataloged parts from the leading manufacturers of tractors and harvesters in the national and international markets, available to our customers.

Agricultural Implements

We offer a wide variety of parts for agricultural implements, made with high-quality and durable materials to ensure the best performance in the field, bringing savings in equipment maintenance.

GET TO KNOW OUR PRODUCTS

On our website, you can check out all product options and keep up with the latest brand releases. Send a quote request to our sales team and download available catalogs.
