

Full Line of Concrete Paving Equipment

Slip Form Pavers

Available Models: • SFP8-15 • SFP10-17
• SFP12-27 • SFP14-37

*Custom widths available to meet your project requirements.
Sizing and adjustments available in imperial or metric.*

- Standard paving widths from 2.75m to 13.5m
- Auger/strike-off system standard
- Hydraulic vibrators
- 2 or 4 track models available
- Hydraulically adjustable side forms
- Hydraulic string line sensors for grade and steering
(electric sensors also available)

Form-Riding Pavers

Available Models: • FRP9-18
• FRP12-27
• FRP14-37

*Custom widths available to meet your project requirements.
Sizing and adjustments available in imperial or metric.*

- Standard paving widths from 2.75m to 11.25m
- Folding auger/strike-off standard
- Hydraulic vibration and tamping system standard
- 4 form riding wheels
- Hydraulic sensors for steering
(electric sensors also available)

Placer

MP2500 Placer

- 91cm x 4.4m lower transfer conveyor
- 91cm x 10.6m rear delivery conveyor
- 3670 liter (4.8 cubic yard) capacity hopper
- 2 crawler tracks

HEAVY EQUIPMENT MFG • 601 E FIRST ST • GRUNDY CENTER, IA 50638

Who is Heavy Equipment Manufacturing

HEM has been in the business of designing and building concrete paving equipment since 1997.

Formed by like-minded engineering and paving specialists, it was organized with one result in mind, innovation, durability and quality at an affordable price, for the world market.

Polyester Slip Form Pavers

- 4 Post grade control system
- Auger/Strike-off system
- Hydraulic pan vibrators
- Rubber crawler tracks

Support Equipment

Work Bridges *Manual & Powered*

3 wheel & 4 wheel Concrete Breaker

Cure Carts

Road Groom *Gravel Road Maintenance*

Trimmer

HT4502 Trimmer Placer

- 2 belt conveyor delivery system
 - 91cm x 10.6m (36" x 35') rear conveyor
 - 91cm x 4.8m (36" x 15'8") lower conveyor
- 3.8m (12'6") sectional trimmer head (*available up to 5.5m*)
- 2 crawler tracks
- Hydraulic or electric string line sensors for steering and grade control
- Optional placing head also available

Placer/Spreader

Available Models: • PS12-28
• PS14-40

- Front spreader auger system
- 2 crawler tracks
- 1.52m x 7.31m (60" x 24') folding delivery belt system
 - (4.26m outside of track)
- 4 point outrigger system
- Hydraulically adjustable side forms
- Hydraulic or electric string line sensors for steering and grade control

Service & Support World-Wide World-Class

✓ **HEM** provides technical support and training on the customer's site with the customer's staff. Qualified operators and technicians are available for long and short term hire.

✓ **HEM** technicians are ready to assist customers all over the globe and ready to travel on short term notice. Our service lines are open 24/7.

Texture Cure w/Rubber Track Drive

Available Models: • TC1200 • TC12-28

Options available:

- Hydraulic sliding frame
- Curing system
- Hydraulic burlap (*or astro-turf*) drag
- Wire tine texturing system (*transverse or longitudinal*)
- Hydraulic or electric string line sensors for forward or rear steering

MagnaCut - Sawing System

- Nothing touches the concrete but the blade itself
- Transverse and longitudinal sawing system
- Up to 7 longitudinal saws available
- Fully automated system
- Automatic steering and depth control

Canal Paver

- Paving configurations for single pass trapezoidal canals or multiple pass depending on job size & concrete delivery
- Full depth vibration
- Tamper, auger system
- Machine can be converted for flat paving

Quad-Tube Roller

- 2 Paving rollers, 2 travel rollers
- Full depth vibration
- Full width auger/strike-off
- Rubber crawler tracks for travel or strike-off
- Minimal handwork needed

Relationships

World Wide Solutions,
One Customer at a Time

- ✓ At **HEM**, we know the success of the job is directly related to how the customer is equipped and trained.
- ✓ Our involvement with details starts early and continues long after the machinery has been commissioned.
- ✓ Long term personal and business relationships are the goal.
- ✓ **HEM** provides technical support and training on the customer's site with the customer's staff. Qualified operators and technicians are available for long and short term hire.
