

WHO WE ARE

Mission →

Delivering innovative energy solutions that power a sustainable future

Vision →

To be a trusted global partner in accelerating the transition to intelligent and sustainable energy systems.

WHO WE ARE

IPP Global is an Energy company with a focus on renewable, sustainable and clean energy. Our objective is to provide sustainable energy sources to users across the world.

We are deeply invested in ensuring that we provide alternative but sustainable sources of energy and leverage our unique relationships to provide best in class solutions for our unique customers in a manner that reduces their carbon footprint, has minimal negative impact on the environment, is sustainable and ultimately, economical over the long term. We have partnered with best in class companies to ensure that we can deploy innovative solutions designed to satisfy energy demands in every part of the world. Our niche is providing bespoke solutions for small-to -mid scale projects, with a focus on projects less than 100MW in power generation at a time.

Our objective is to provide sustainable energy sources to users across the world.

Our niche is providing bespoke solutions for small-to-mid scale projects,

OUR VALUES

IPP Global has an unwavering belief that people are critical to our success. We put people at the heart of all that we do, fully aware of the impact our actions, processes and policies have on them.

Be it our clients, co-workers, host communities, suppliers or other stakeholders. Our ecosystem is filled with people who share our core values: Passion, Creativity, Focus and Curiosity

Passion

As passionate professionals, we are dedicated to delivering our promise to our clients with an unparalleled drive to create results.

Creativity

Our drive for innovation pushes us to look for better and more efficient ways of meeting our obligations to our stakeholders.

Focus

We focus on innovative operational solutions that are cost and time efficient and make the most of every available resource to ensure our clients are always at an advantage.

Curiosity

We constantly explore opportunities and push the boundaries to find innovative solutions by inquiring information, testing out theories and trying out new ways of solving world energy problems.

Gas Processing & Virtual Pipeline Solution

Normally flared
high BTU gas

Decompression Unit for
Delivery of Gas to Turbine or Genset

Raw gas is conditioned and
moved via virtual pipelines
(proprietary technology)

WHAT WE OFFER

Natural Gas Processing

- Virtual pipeline technology which helps companies address their flare reduction solutions.
- Flare to power solution: Flare gas processed through the modular natural gas processing plant into LNG, LPG and CNG and fed as fuel to the power plant.
- Steady supply of natural gas to end users both within and outside the country.

Our solutions are

Efficient, effortless to deploy and easy to operate.

Our Virtual pipeline eliminates the need for fixed gas pipelines to run gas turbines for power generation. It also eliminates all the costs associated with building a fixed pipeline.

Units are scalable. The plant can be expanded as your needs for compressed natural gas grows.

Effective for the reduction of flare gases Lowers end user carbon footprint.

WHAT WE OFFER

Wind Turbines

Mid sized wind turbines with blade spans from 52 to 61 meters which produces energy from 500KW to 1MW. The wind turbines we focus on are suitable for rural electrification.

- The wind turbines offered to our clients can be onshore or offshore installations.
- We offer Partnership opportunities with interested local investors
- The wind turbines are for mid-size projects which are easy to install and offer quick rewards to the community.
- We offer a full value service to ensure complete performance of the equipment through its designed life cycle

WHAT WE OFFER

Solar Power

- Mid sized solar power generating plants for mini grids and off- grids
- Hybrid solutions to ensure seamless power generation
- Commercial and Residential Power Solutions

Energy Storage

- Mid sized energy storage solutions for mini grid and off- grid systems to ensure uninterrupted power supply.
- Commercial and Residential Power micro-grid Solutions

Engineering & Energy Analytics

We provide end-to-end engineering and analytics services to ensure systems are efficient, reliable, and optimized.

Front End Engineering Design (FEED)

We develop execution-ready project frameworks that reduce risk and improve outcomes, and translate concepts into execution-ready project plans:

- Technical specifications
- Cost modelling
- Risk analysis

Feasibility & Energy Studies

Clear, data-driven analysis covering:

- Demand profiling
- Resource availability
- Technology selection
- Financial viability

IIoT & SCADA Monitoring Systems

Real-time visibility into system performance.

Capabilities:

- Remote monitoring
- Predictive maintenance
- Performance analytics
- Fault detection

Outage Supervision & Technical Support

Ensuring systems remain operational, optimized, and resilient over time.

IPP Global has the ability to put in place funding levers, business structures, regulatory and governance framework, and other requirements to ensure project success.

IPP Global appreciates that different environments and clients require different solutions, and we are committed to providing solutions that are Relevant, Practicable, Realistic, and Future-proof with a design which is modular, scalable and easy to upgrade. We believe that IPP Global can contribute significantly to the achievement of your energy targets within the shortest time possible with our bespoke solutions.

We maintain flexibility on our projects to enable us provide tailor made solution for our clients.

We offer full value service to ensure complete performance of the equipment throughout its designed life cycle

We work with Partners in the US to provide state of the art equipment across the world.

We would be delighted to meet with you at your earliest convenience to discuss further.

Please do not hesitate to contact us.
We look forward to a mutually beneficial relationship with you.
