

Developing and implementing innovative ideas to enhance management and empower human capabilities

Our company

I&D Consulting is a company specialized in the implementation of projects, programs and consulting. As a company we are committed to the economic, social and democratic development of the Central American region. We contribute to this through different actions that involve the design, development and implementation of models, programs and systems, which improve efficiency in the management of the public and private sector, and the participation of civil society.

Our experience

10 years of experience at Central American level, providing technical assistance to public, private and civil society institutions, including the formulation of public policies, the design and implementation of management models and systems, process reengineering for efficiency and control of workflows, diagnosis, analysis and design of information systems, virtual education systems, among others.

Our achievements

Technology

Developing and implementing dozens of technology products at Central American level for process management, electronic files, virtual education platforms, document management, open data, access to information, web development, among others.

Process improvement

50 successful experiences improving processes under participatory methodologies in public institutions, in justice areas, transparency, environment, urban planning and territorial planning, among others.

Virtual and in-person education

More than 80 training processes implemented with measurable results and high quality in the production of audiovisual and interactive materials.

Law and policy formulation

Accompanying dozens of participatory processes of law and public policy formulation, in areas of modernization of services, territorial planning, transparency and anti-corruption, creation and reform of public entities, civil and business regulations, access to justice and criminal regulations.
