## COVERAGE AREA

Suck Milk brings solutions in machinery and equipment for small dairy and agroindustry throughout the country.

Opting for the Suck Milk brand, the dairy entrepreneur gets,

**Viable Projects**

**Best Technology**

**Easy Maintenance**

**Technical Support**

**Production Efficiency**

## MACHINERY AND EQUIPMENT

Suck Milk's line of equipment for milk industrialization is all manufactured with stainless steel 304, specific for food handling, ensuring the quality of products. With Suck Milk equipment, in addition to quality in products, you have practicality in performing the daily work of your dairy, by the functionality of the equipment, because they are designed with a focus on the efficiency of results.

With the use of Suck Milk equipment, you add value to your production and increase your income, with new business opportunities, by transforming milk into dairy products. For each type of product, we have machines and equipment suitable for the manufacture of dairy products, as presented below:

### Pasteurized milk

The line for pasteurization of milk covers the processes of reception, pasteurization, packaging and storage, contained in them machines and equipment such as the tank for collection, cooler (silo), slow or fast pasteurizer, packing machines, cold chamber.

\*In the pasteurization line you can also find the milk pasteurizer for heifers.

## Cheeses

The cheese manufacturing line includes machines and equipment intended to perform the following functions: pasteurization, manufacture, maturation, packaging and storage of the most varied types of cheeses. Among them are the slow or fast pasteurizer, tank for cheese making, queijomatic, monoblock, tables, press, shapes and desoradores, salting tank, shelving, vacuum packing and cold chamber. In addition to auxiliary equipment, such as countertops and cart shelf, and the sanitary barrier for hygiene, such as sink, lava boots and tank for CIP washing system.

## Other derivatives

In this line are the machines and complementary equipment for the manufacture of milk derivatives: yogurt, milk drink, cream, curd, ricotta, butter, milk jam and ice cream.

**\*When thinking about investing in a dairy or improving/expanding its production of dairy products, it is essential to have the support of a qualified team, to help from the definition of the idea to the choice of the appropriate line of machinery and equipment for the manufacture of each dairy product. This is how Suck Milk can help you, with more than 25 years of experience working in the manufacturing market of machinery and equipment for milk industrialization, the knowledge and accumulated experience ensure that we can contribute to our client's project to get the best results. Prioritizing the quality of all our services is one of our main values, now validated by ISO 9001 certification.**

## LINE OF INDUSTRIALIZED PRODUCTS

# COUNTING ON SUCK MILK TECHNICAL SUPPORT

## 1. Developing architectural design for agroindustry.

Suck Milk designs the project with a prospect of future expansion, within the chosen modality and economic viability of the client.

- Geographical location plan;
- Low plan, with cross and longitudinal sections;
- Hydraulic plant;
- Electrical plant;
- Plant of machinery location and production flow;
- Effluent treatment plant;
- Preventive plant against pests;
- Fire prevention plant;
- Descriptive memorial of physical construction;
- Sanitary memorial;
- Memorial descriptive effluent treatment.

## 2. Providing cold chamber

- Mobile Cold Chambers.

## 3. Providing machinery and equipment for dairy products

- All machines and equipment offered are always the most suitable for each production line to which the customer is choosing.

## 4. Technical support for Suck Milk customers

- Technical support service to minimize production stops, web aid.
