

AULATIC – CLASSROOM 4.0

AulaTIC is an Interactive Classroom System for E-Learning, this is a controlled hybrid environment virtual/face to face, allowing teaching to students face to face and distance learning.

¿WHAT IS IT?

Our Interactive Classroom System allows teaching through integration of a LMS platform, a sensitive blackboard and video conference software, this becomes simple and very functional e-learning way.

A group of the students in class face-to-face, other group by video conference and those who cannot use any of two options will have access at class recording and course content in the LMS.

Our system complies with government objectives about biosecurity for students in blended mode obligatory for the education district.

ADVANTAGES

- ✓ Teaching in a hybrid environment to students in the 3 ways face-to-face and virtual (online and offline)
- ✓ Improve learning with an interactive blackboard displaying the contents available on the different platforms of the school or any software / VLO* installed on the classroom computer or in the cloud.
- ✓ Connect to any video conference platform.
- ✓ Provide own content such as Word, Excel, Power Point, videos or PDF files.
- ✓ Record classes to store them and publish them in your own LMS.
