

***Please protect yourself and protect others under the epidemic situation***

GB2626-2006 KN95

Protect your lungs and prevent  
the spread of droplets

95% -99% of air droplets, germs, infection sources, allergens,  
dust particles in the air can be efficiently filtered

Defend the health of you and your family

***Medical grade / blocking bacteria / high efficiency filtration /  
comfortable and breathable / quality assurance***

## Healthy Breathing

### ***Harmful air pollution is no longer filtered by the body***

Droplets in the air carry a variety of germs, harmful sources of infection, dust particles caused by respiratory and lung viruses, pollen hairs and other allergy symptoms caused by allergies. Respiratory health should be paid more attention to all the time.

*bacterial*

A microscopic view of numerous rod-shaped bacteria, appearing as small, elongated, greyish structures against a dark blue background.

*Particulates*

A close-up of a cigarette with a thick plume of white smoke rising from the tip, set against a dark blue background.

*Haze*

A city skyline with several tall buildings, including a prominent skyscraper, partially obscured by a thick layer of grey haze.

*Dust*

A person wearing a white, pleated dust mask that covers their nose and mouth, with only their eyes visible.

*Pet Hair*

A woman with dark hair, wearing a dark top, sitting on the floor and holding a small, light-colored dog.

*Pollen*

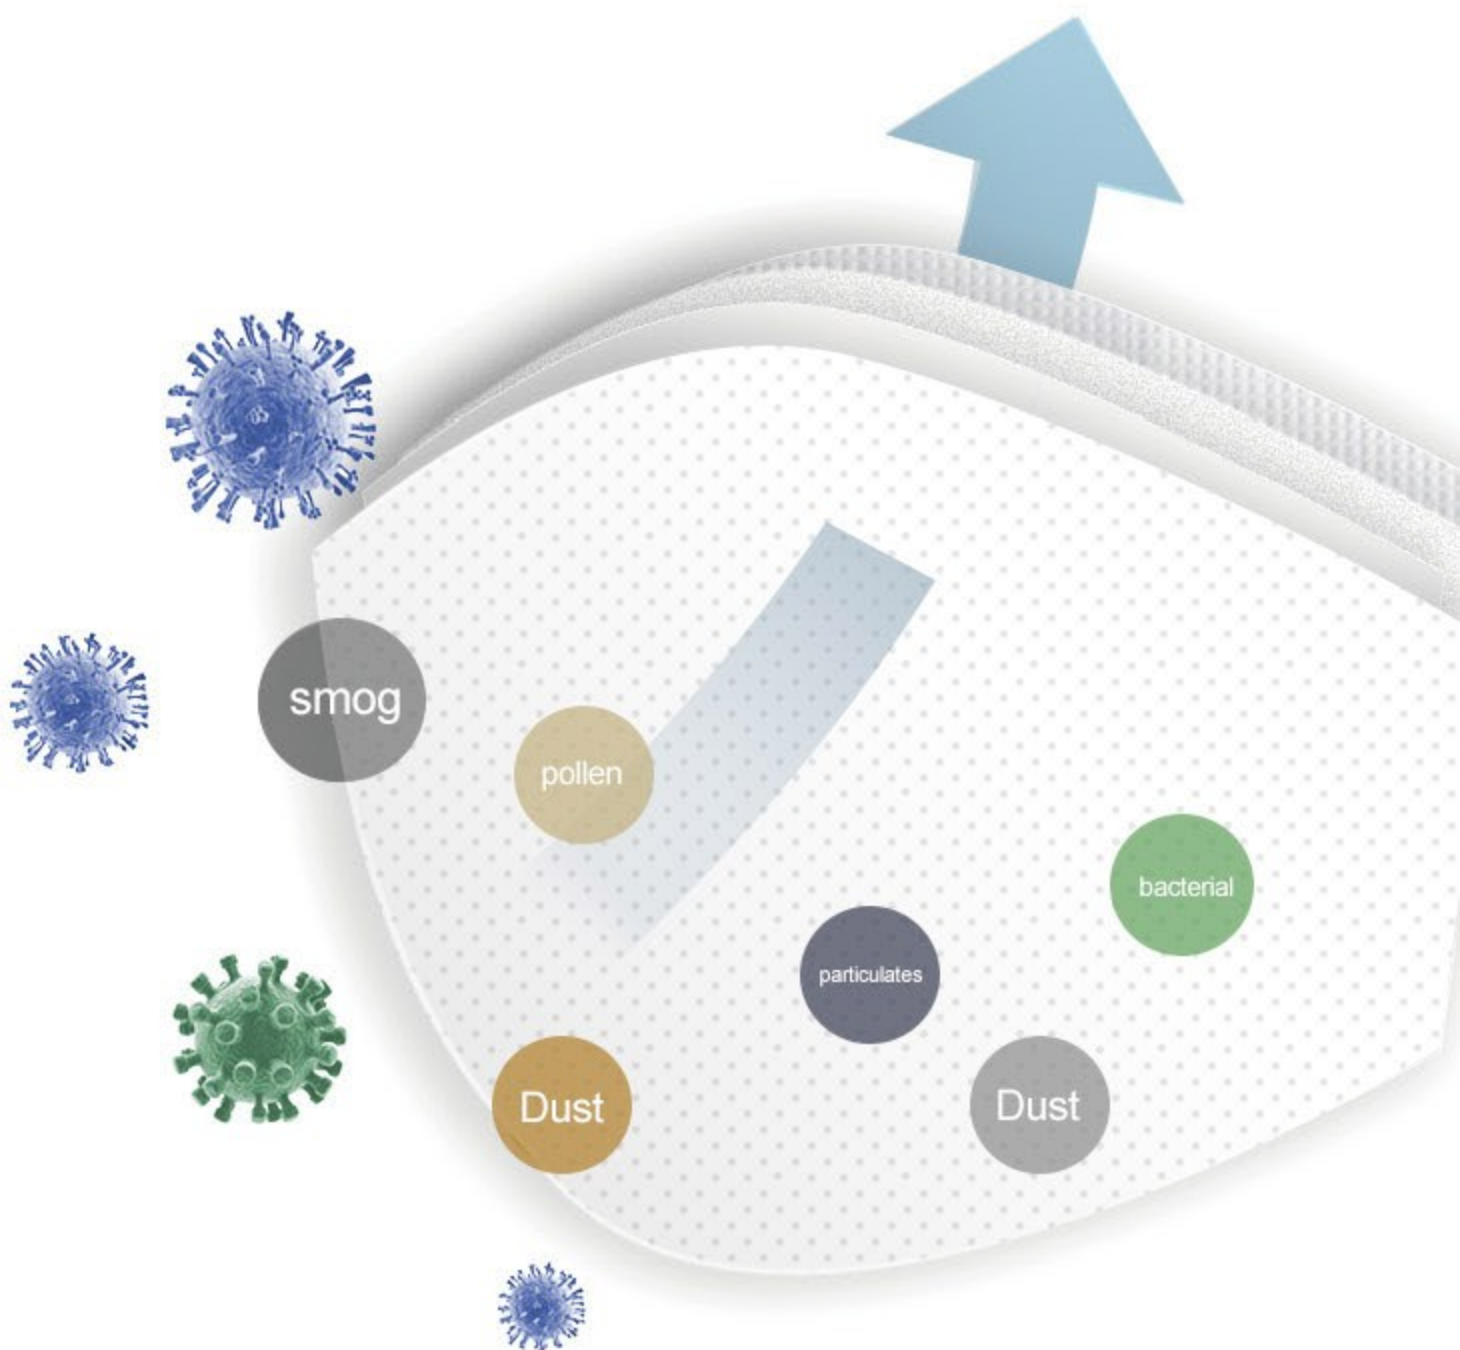

A close-up of several white daisy flowers with yellow centers, set against a dark blue background.

## Powerful Filtration

### ***Strong filtration by multi-material***

Multi-layers of protection to defend your breathing health, can effectively block all kinds of air pollution, light and breathable, and minimize breathing resistance.

**01**

Intercept droplets, block particles and other pollutants

**02**

3D stereo-cut to fit the face for better isolation

**03**

Soft lining, well dehumidified and breathable to improve comfort

## Seam less Barrier

### ***Adjustable and shapeable nose clamp for seamless barrier*** — —

The blue side is outward, the nose clip is upturned, the ear strap is hanging behind the ears, press the shapeable nose clamp to make it fit the face so as to prevent pollutants strictly from the gap.

**Soft  
FiberTouch**

***Soft skin-friendly touch  
to enjoy comfortable experience***

— —

**Easy to  
Breathe**

***The surface is evenly covered  
with pores, light and comfortable,  
to enjoy breathing freely***

---

## Product Information

Product Name: KN95 protective mask

Product Color: White

Product Size: 15.5x10.7cm (soil 0.5cm)

packing specification: 12.5mx9.5cmx12.5cm (20 pieces / box)

Carton specification : 64cmx27cmx49cm (50 box / carton)

### ***Product Features:***

- 1、The ultra-fine fiber electrostatic melt-blown cloth composite hot-air cotton and spun-bonded non-woven fabric are used to form a four-layer filter to filter harmful substances more effectively.
- 2、According to the ergonomic design of the 3D stereo shape, not only ensure tightness but also increase the breathing volume of the mask, greatly improve breathability so as to wear and breathe more comfortably.

### ***Operating steps***

Stretch the mask to cover the nose and mouth, and hang the ear straps on both ears

Fix the nose clip as per the nose shape (blue side is outward, nose clip is on top)

## ***Comfortable ear straps***

Selected high-quality cotton ear strap  
to enhance toughness and softness

## ***blank pressing closely***

Banking pressing closed by ultrasonic  
stitching technology to provide safe and  
effective functional masks.

## Powerful Filtration

***Quality assurance, authoritative testing***  
***Can filter 95-99% bacteria***

---

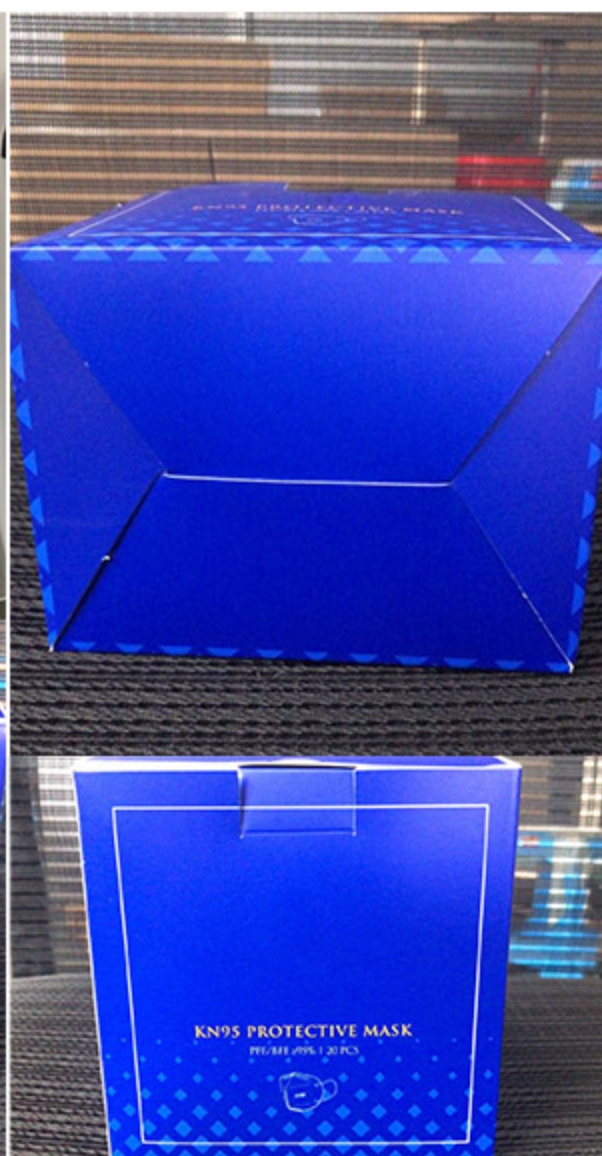

Conforms to China mask standard at GB2626-2006 KN95,  
Tested by a number of international testing agencies and it  
is in line with the international KN95 mask standards
