About Us

We Believers In Change- a Change Driven By Technology And Innovation.

As a technology pioneer with deep knowledge and expertise in AI, IoT, and other Software Development technologies, KPIS believes in supporting the industry to overcome its most difficult tech challenges and drive business growth. We build future-ready AI and Software solutions for startups, scale-ups, and businesses utilizing advanced technologies.

We are committed to delivering customized software solutions across all industries. We are positively focused, managed, and dedicated regarding our work, and because of this, we never compromise on our quality deliverables. We design & develop user-friendly websites/portals that are effortless to navigate and scalable per your business objectives.

KRISHNAPADAM
IT Solution

Our vision & mission

We aim to become one of the most successful and preferred IT solutions companies for various business requirements like start-ups, SMBS, and enterprises delivering the best combination of creation and technology leadership.

We at Krishna Padam IT Solution develop software solutions that utilized advanced technologies in Mobile apps, IoT, AI, Software & Game Development. We appreciate our customers and deliver them the best professional services to help their business to achieve its height.

Our Core Values

TRANSPARENCY

Quality, Time, Cost and Value– these help us ensure transparency in our development work and maintain long-term relations with our esteemed clients.

INTEGRITY

We follow a set of ethical values while partnering with our clients. It boosts our service morale and builds a stronger brand perception for our clients and users.

QUALITY

We use state-of-the-art technologies and set up a proficient team that allows us to fabricate high-quality yet cost-effective solutions at the global level.
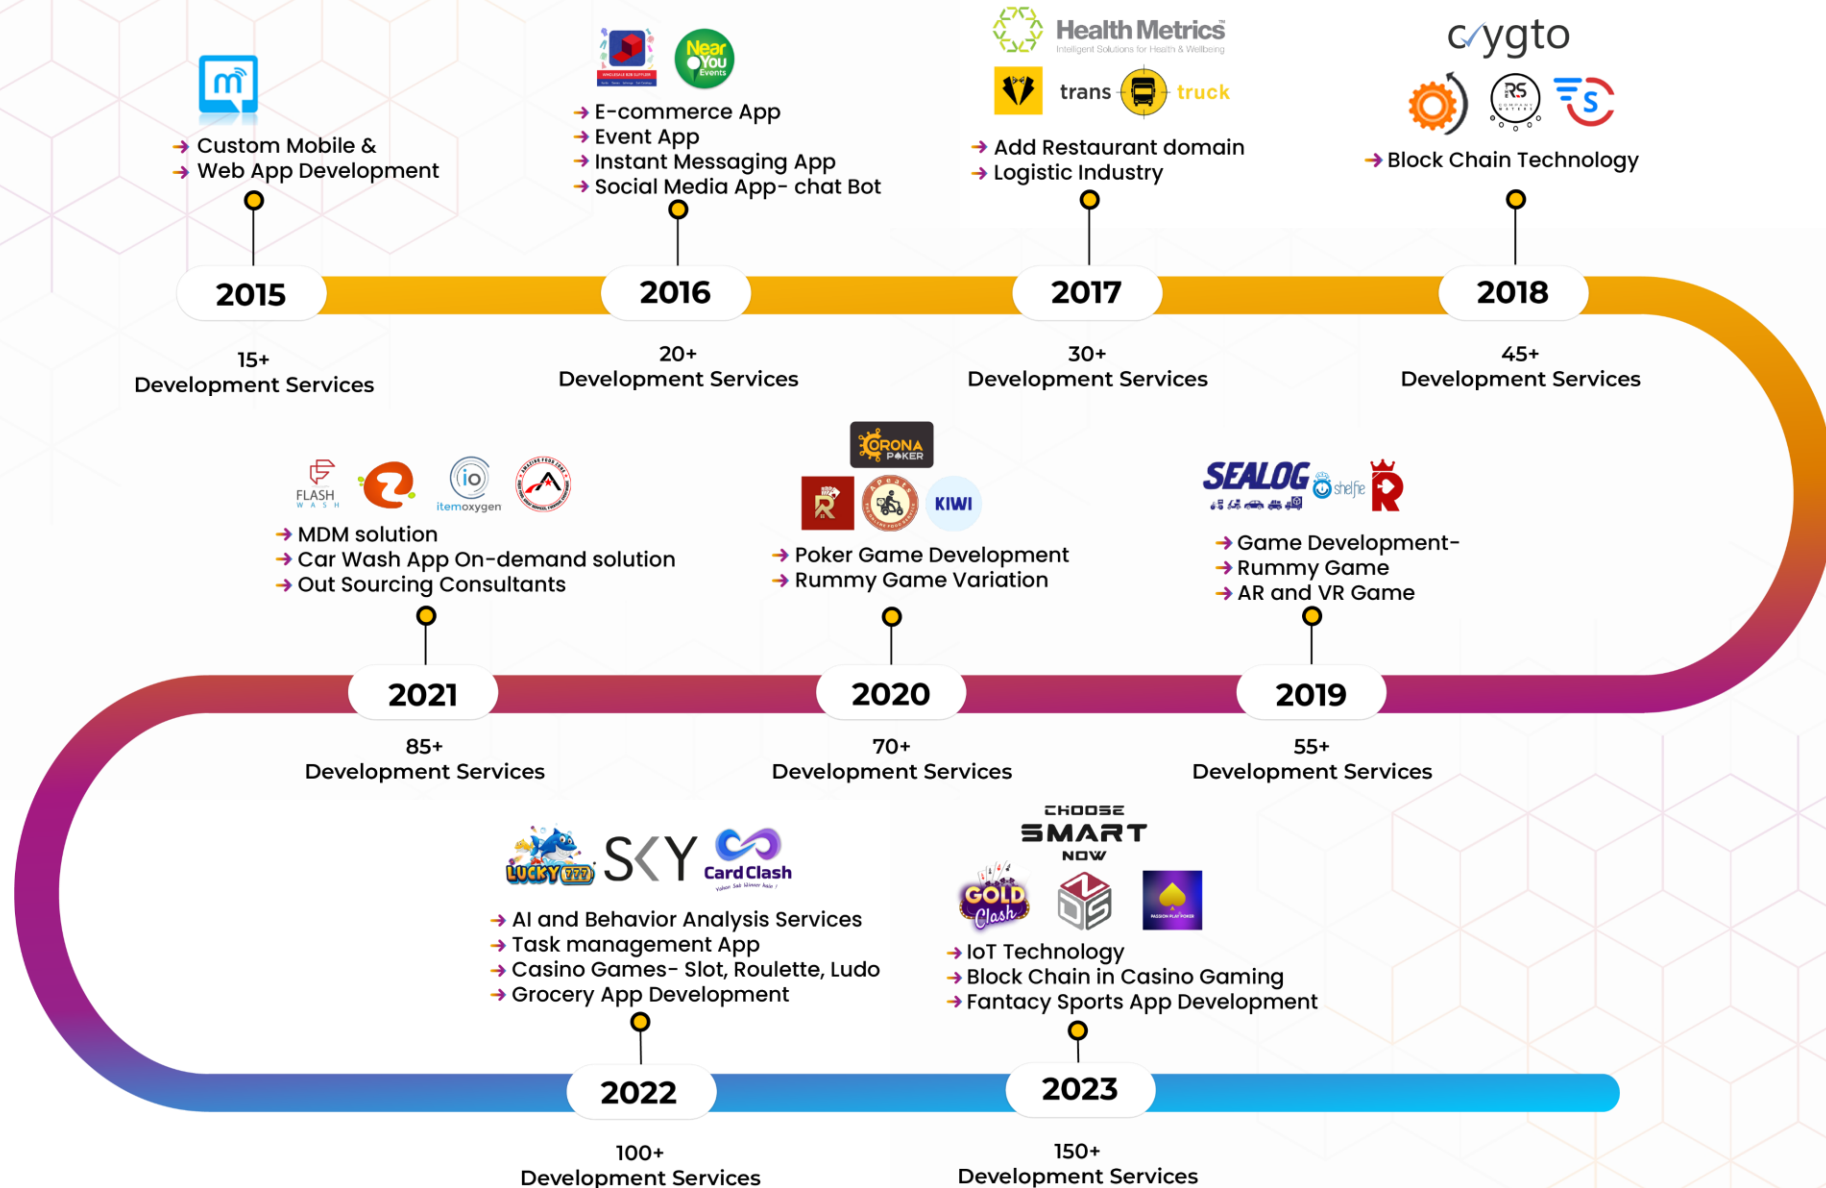

FUTURE-FOCUSED

We pursue long-term value creation rather than short-term expedience. We do things today that your future self will thank you for.

Our Services

KRISHNAPADAM
IT Solution

Software Development

We develop and deliver high-quality, cost-effective, reliable, full-cycle bespoke software to match your organization's needs., budget, and timeframe.

Mobile App (Android & iPhone)

With the start of a new era for mobile app development, KPIS professional experts develop customized mobile applications suitable for all types of devices, keeping in mind users' requirements.

Internet of Things (IoT)

Beat your opponents with a feature-rich IoT-based application and improve your business ROI 2x times faster. We offer IoT solutions for many industries like healthcare, automobile, energy, manufacturing, retailing, and more.

Database Services

Store all your data securely in the best modern-day databases and integrate them with your website for fast loading.

Web Development

We create web applications for all types of businesses, from small startups to large multinational clients, providing users with a unique digital experience.

AI & Machine Learning

We harness the power of AI & ML to equip businesses with cutting-edge insights and automation. We use our expertise to create embedded AI applications for iOS and Android devices.

DevOps Development

At KPIS, we have crafted a process that ensures the right things get done by the right people at the right time. We provide a comprehensive set of DevOps services like CI/CD, Microservices, and platform as a service.

Mobile Device Management (MDM)

Our Mobile Device Management services support remote distribution of data, configuration settings, and applications for various mobile devices.

Industries We Serve

As a leading software solution company, at KPIS, we welcome customers from different industries, whether they need to integrate a new software system into your infrastructure or redesign and upgrade outdated solutions.

Food and Beverage Industry

KPIS brings innovation and expertise together to deliver top-rated food delivery, smart restaurant management, and related creative products. We create a difference by perfecting the conversation-centric solution and crafting commerce experiences that delight people.

Logistics and Transportation

At KPIS, we provide our customers with advanced web and mobile transportation industry solutions to keep people and goods on the move: Fleet And Cargo Management Solutions, Logistics Software Solutions, Dealer Management Systems, and Travel Management Apps, as well as systems for valet parking.

Gaming Industry

Whether it's a mini-game app or a project for millions of players, as a Game Development Company, we offer a full range of Game Development Services to build engaging, human-centered games. Our cost-effective & tech-smart Mobile Game Development Services will let you dominate the gaming industry.

Industries We Serve

Healthcare

Build a hassle-free healthcare website to offer all medical & health-related information to your customers. We help you to implement and design secure healthcare app solutions to provide medical data that are composed of guidelines. We leverage the web, mobile, and medical devices to help the next-gen quality of healthcare software solutions.

Industrial Manufacturing

Industry 4.0 is the new industrial revolution towards production perfection. KPIS helps customers design, deploy, and manage Industry 4.0 solutions. The software solutions we provide to assist in this focus on improving the digital maturity of core manufacturing functions across product and asset life cycle management, onsite and remote operations management, and more, all of which harness the power of industrial IoT and big data analytics.

Retail & eCommerce

For businesses operating within the retail industry, eCommerce applications and digital services are a way to reach pace, increase customer loyalty and engagement, and most significantly, boost revenue. Our retail & e-commerce development team builds next-gen, feature-rich, and scalable e-commerce solutions to empower B2B & B2C businesses, effectively reach customers, and improve sales numbers.

Construction Industry

Taking advantage of various technologies, KPIS provides Construction Software Development to improve processes in your business KISS and help it with trends, deep insights, and much more. Our team offers full-scale software for enterprises to digitalize construction business processes, maximize operating efficiency, and boost income.

Industries We Serve

Automotive (Automobile) Industry

With the growth of mobile-to-vehicle connectivity, KPIS provides Automotive industry Software Development to enhance customer experience, generate revenue, and decrease cost. Our team will be pleased to develop a product to optimize online business management, IoT-connected car software, advanced driver and autonomous driver systems, and many more.

Media & Entertainment

From media and OTT Apps to entertainment apps, we provide complete mobile app development services for startups and enterprises, enabling them to expand their brand globally. We build software and machine learning solutions to improve user experience, such as helping integrate your devices.

Financial Industry

The banking and financial services sector has transformed massively in the last few years. A leading IT Solution Development Company, KPIS builds innovative banking & finance applications, payment gateways, blockchain wallets, and other individual features to automate processes, track information, and more.

Education & E-learning

With the rise of remote learning, educational institutions and training providers are working towards making education more immersive. We work with these providers to create interactive learning environments, easy-to-use education mobile apps, E-learning portals, multi-level analytics tools, and more.
