

Karbook

Driving Change

End-to-end car repair experience

In less than a year Karbook has positioned itself as the most innovative end-to-end car repair experience platform.

Karbook operates in 20 states of Mexico and is expanding to Latin America, Germany, the Netherlands and USA.

Problem

70% or 140,000 of all auto repair shops in Mexico do not have the technological tools to manage their business and provide professional repair services.

70% or 28 million of all vehicle owners in Mexico do not have access to road-side assistance nor a reliable mechanic.

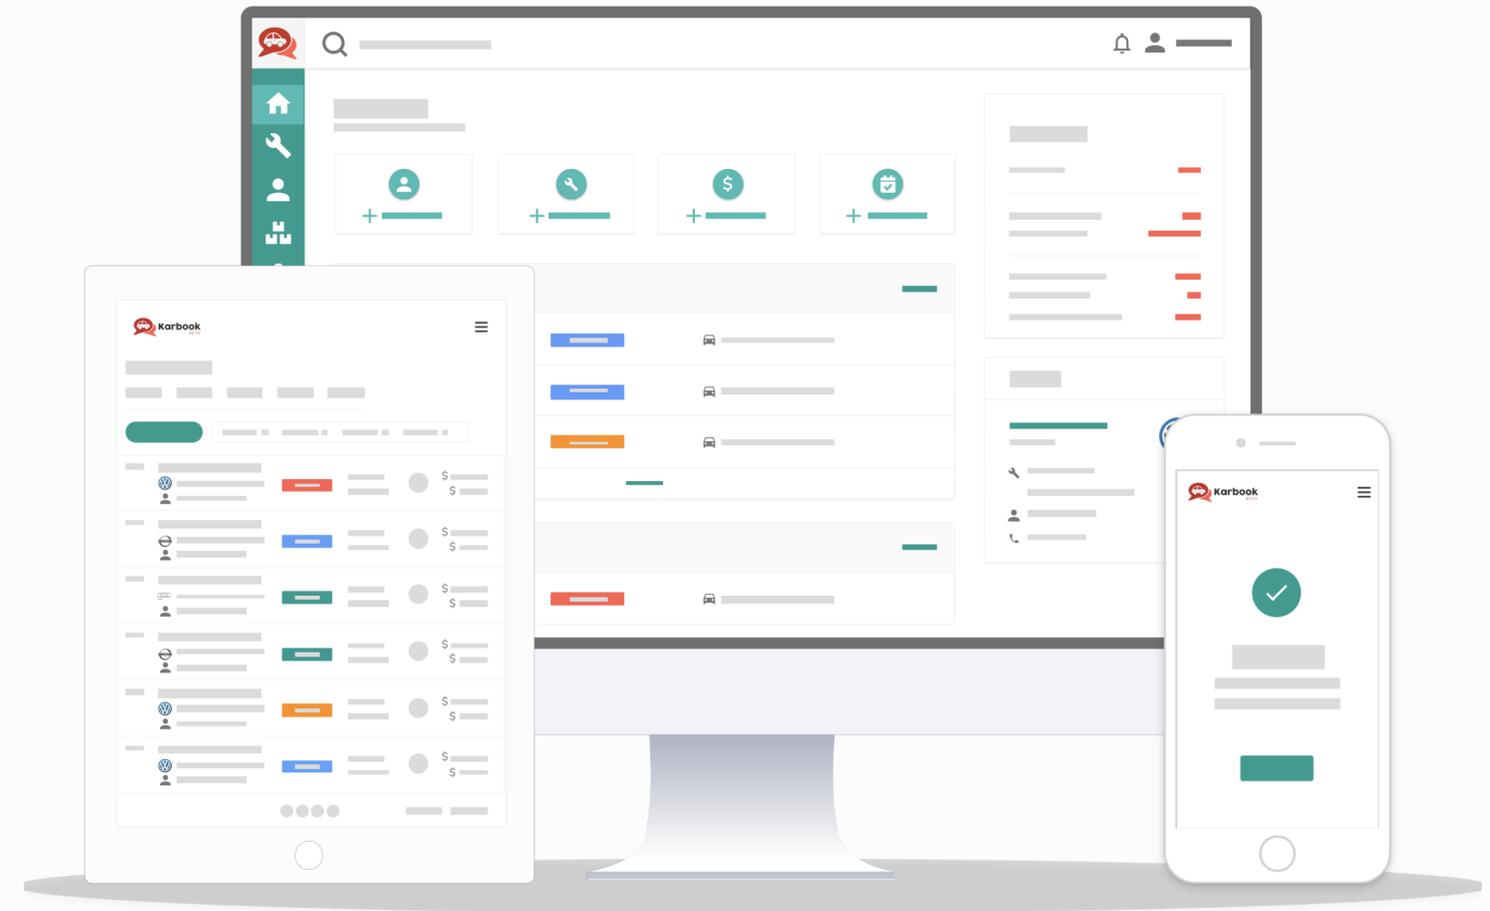

Solution

Build the first end-to-end car repair experience platform by connecting car owners with auto repair shops.

Easy communication.

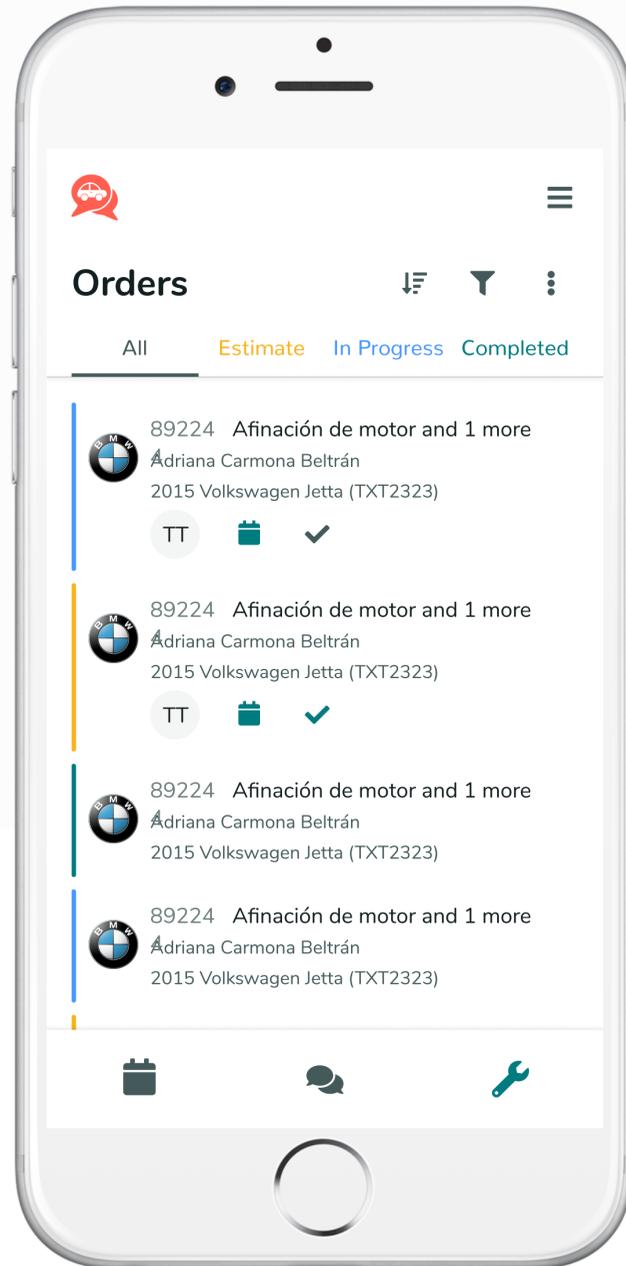

Transparency.

Efficiency.

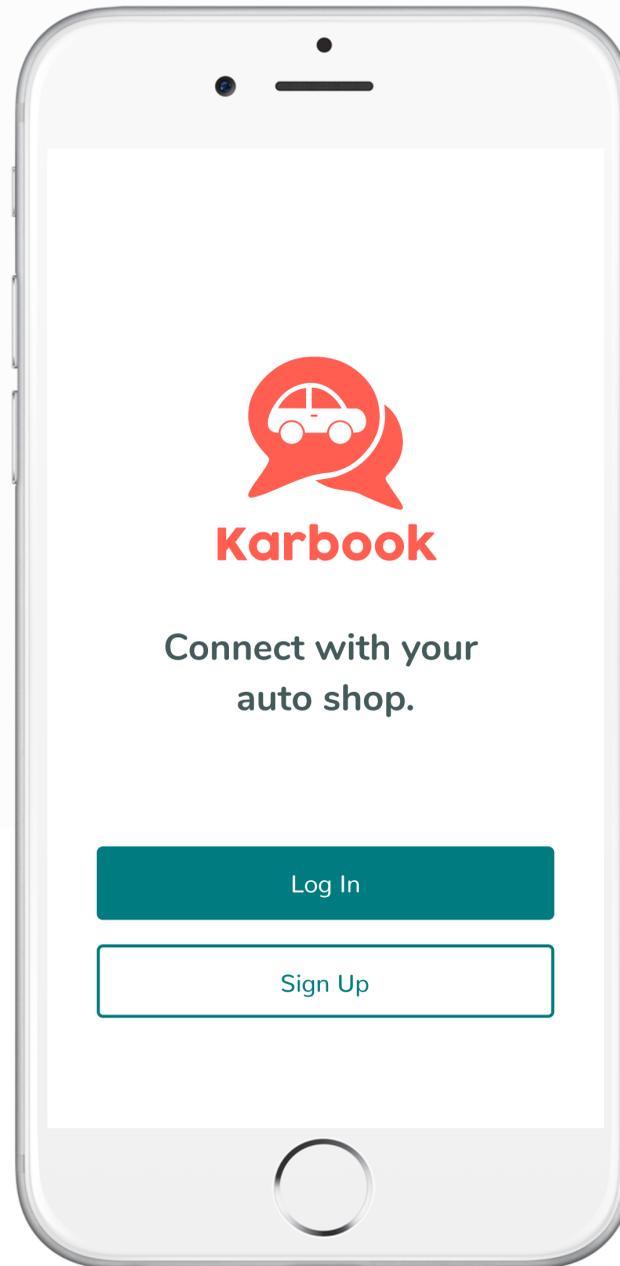

Product

Auto Shop Management System

Integrated assistance and car repair marketplace

End-to-end communication platform

Market Size

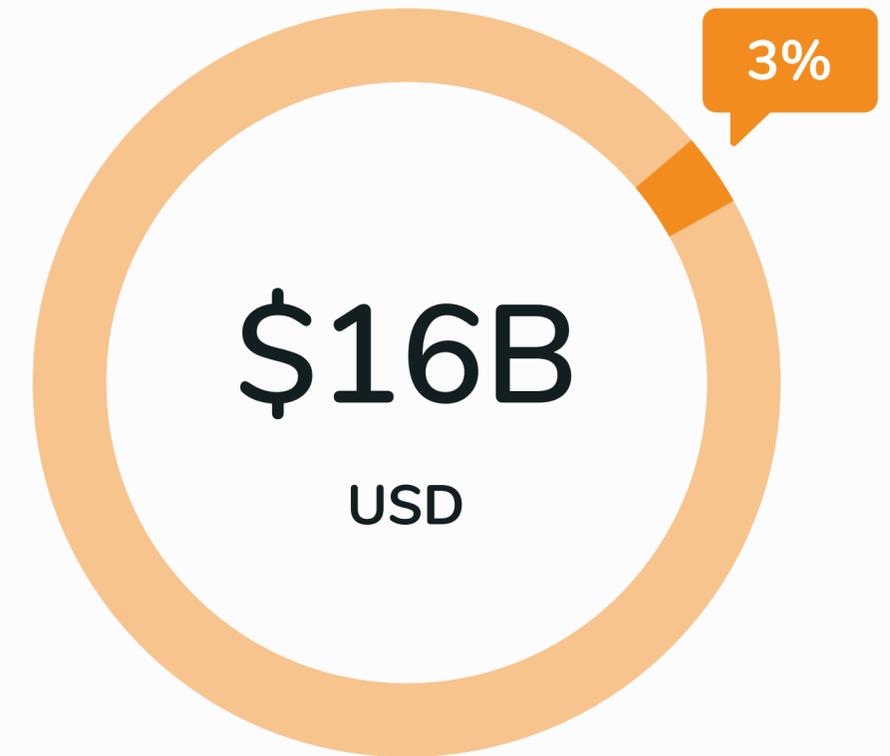

Global Market

Automotive Repair and Maintenance Service Industry

TAM

Independant Repair Shops

Target Market

Early-Adopter Repair Shops
