Kartero

Kartero is a suite consisting of a mobile application and a flexible web-based administration panel. With these tools you will be able to manage the delivery and collection services that your company offers, generate visitor statistics, access logbooks, directly manage contacts with customers.

Kartero is mobile application for managing your business delivery and pickup services. You can use Kartero for your business like Pickup & Delivery, Beauty Services, Repair Services, Home Services, Health and Well Being and any type of Businesses that needs to monitor daily activity task in Realtime.

Kartero meets the highest standards of quality and security that a software must have.

The mobile application is available for devices with Android and iOS operating system. This suite is fully designed with operational standards and will fully comply with the technological definition "Parameterizable" or "Open System." The web administration panel is made up of various maintenance, reports, consultations and processes that facilitate the control of employees and the tasks assigned to them, follow-up of deliveries and / or collection.

With Kartero you can:

Streamline the logistics

An interactive map based interface lets you streamline your entire process from allocation you dispatch and from scheduling to tracking a delivery. It enables you locate your workforce on the map in real time.

Communicate seamlessly

Kartero comes with an integrated 2-way notification which can be used to serve and update your customers about their delivery at regular intervals and manage your mobileworkforce efficiently with instant updates.
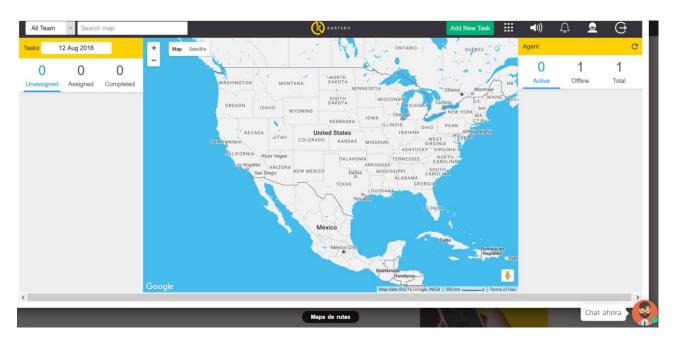

Take data driven decisions

Analytics and graphical report feature available within the dashboard helps you monitor performance of the workforce. Data can be used for decision making to increase customer satisfaction and loyalty
