

## Building the Future Supply Chain

---

Anticipate, Decide, take Kontroll

# Let's start by evaluating if this is for your company...

- 1 Do you handle +10 imports/exports per month?
- 2 Do you have more than 5 suppliers/customers globally?
- 3 Do you need traceability at SKU level and handle multiple references?
- 4 Does each order have more than 100 emails with information, status and documents?
- 5 Do you have an Excel file with more than 10 columns to keep track of?
- 6 Do you have permanent pressure for new savings initiatives?

**If your answer is yes to 2 or more questions...

# Our solution

Kontroll integrates logistics data from a variety of suppliers in the supply chain, organizes this data in a way that is useful, allowing companies to make decisions about their sourcing.

## Real-Time Information

**Notifications and Alerts for decision making**

API / Automated

Partially automated API available by request

# How does **Kontroll** work?

## **Generate Purchase/Sale Order**

Kontroll takes data directly from the ERP

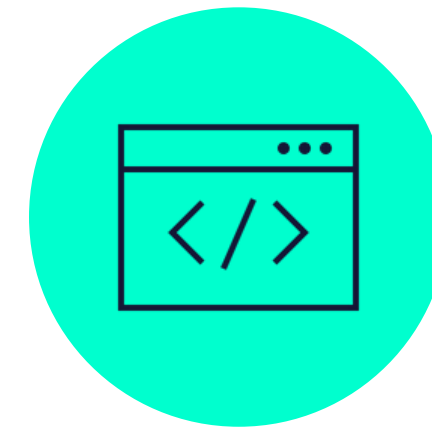

## **International transport Request**

Importer/Exporter can request shipment for the PO/DO through the Kontroll platform

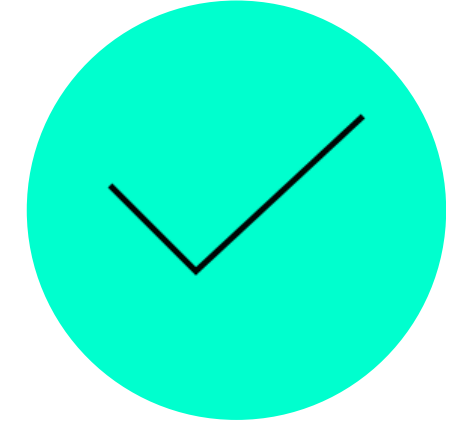

## **Kontroll tracks shipment**

Kontroll uses integration with carriers, shipping lines, customs brokers and couriers to provide the importer/exporter with real-time updates

## **Kontroll integrates all shipments**

Importer / Exporter gains overview of status, costs of all shipments with alerts for delays and any other issues

## **Delivery**

ETA is calculated in Kontroll and the Lead Time is confirmed

# Quantifiable benefits

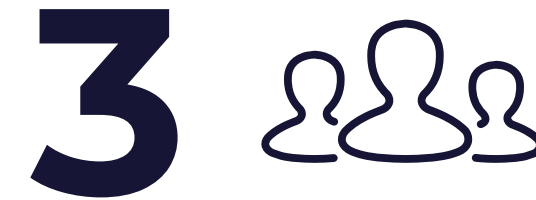

## Inventory

Improved visibility can reduce inventory loss during transport by up to **30%**

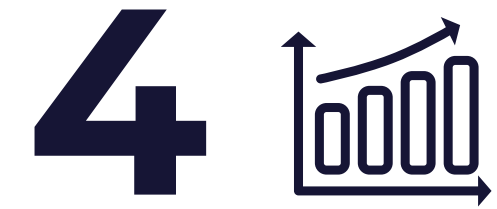

## Logistics Cost

Better purchasing planning, higher levels of consolidation, and container occupancy can lead to reductions of up to **20%** in logistic costs

## Operational Cost

Improvements in productivity within purchasing, logistics, and foreign trade teams can lead to up to **25%** savings in operational expenses

## Sales Increase

Total visibility of goods in transit enhances service times and information flow to customers. Improved service can translate into up to a **15%** increase in sales
