

DESARROLLANDO POTENCIAL

Sustainability as a challenge and an opportunity

Every organization, despite its size, can implement changes, adjustments and set new goals to be more sustainable.

Responsiveness to the ethical and societal demands concerning the environment and human welfare is critical for today's successful businesses.

Demands from society and international community requires organizations to become aware, act and report on what they do financially, regarding society and environment in which they develop.

L184 effectively addresses these concerns. We help both private and public-sector organizations incorporate sustainability in the core of their strategy, operations and culture to make it a source of ongoing and increasing value.

We help organizations boost their actions within the community, improve relationships, and generate effective social impact that engender growth.

ABOUT US

We are a diverse team of professionals, specialized in sustainability management.

We provide consulting services in corporate social responsibility and governance strategy.

We are committed to provide innovative and sustainable solutions to our clients' needs that will boost their relations with their communities and long term development.

Our primary expertise lies within the purview of CSR, with focus on social innovation, local development, and R&D.

group awareness programmes

Linking CSR and Governance
to company culture

Stakeholder relationship
planning

TRAINING

We design and teach workshops in both workspaces and educational institutions, with the aim of promoting values and knowledge based on social inclusion, diversity and collaboration.

We specialize on:

Gender:

creating awareness at the
workspace, gender equality,
gender-based violence.

Minority groups:

underprivileged youth,
indigenous communities.

**Labor inclusion and
employability:**

developing social emotional skills
at the workforce.

RESEARCH & DEVELOPMENT

Knowledge generation is a key element for development. It improves decision making for either public policies or private initiatives

Design and
implementation of Social
Impact Assessments

Applied research analysis: this type of research aims to determine methods to address a specific customer/industry need or requirement

ALLIANCES AND PARTNERSHIPS

We carry out actions in Chile in alliance with Learner Consultant and in Argentina with Inedita a market research and public opinion consultant.
