01 COMPANY INTRO _ Organization Chart

01 COMPANY INTRO _ Management Strategy

HIGH-TECH APPLIED

Linear Low Density Polyethylene (LLDPE) LatinA Tech Bags provide extra strength and puncture resistance compared to Low Density bags (LDPE) of the same gauge. Because of this, it's possible to use a lighter gauge bag to do the job of a heavier gauge LDPE bag, which saves money and helps to reduce the environmental impact.

QUALITY IMPROVEMENTS

Constant research on quality product and effective production strategies, to prevent post-harvest losses at farm, exportation and storage levels. Quality perception control implemented to meet customers needs.

ENVIRONMENT AWARENESS

We support the 'circular economy', by developing sustainable and more resource efficient economy, with reusable plastic products added with thermodynamic decomposition technology.

LAB ANALYSIS & CERTIFICATIONS

LatinA Tech Bags are made from virgin materials, so they comply with FDA requirements for use in food applications. Also, our product data sheet is supported with deep and throughout lab analysis and the required statement of compliance with FDA, EPA, EU commission, ROHS and CONEG international regulations.

02 BRANCH RESPONSIBILITIES

LATINA KOREA

- Check the ongoing schedule of inspections and logistical management.
- Deliver the merchandise to the destinations designated by our customers.
- Inform Latina Colombia the product amount and corresponding delivery dates.

LATINA COLOMBIA

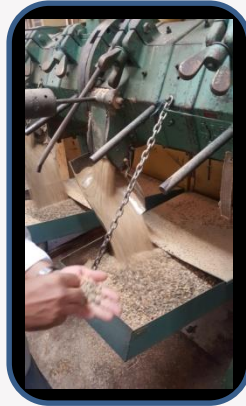

- Purchase the parchment coffee according to Latina Korea.
- Place marine and/or air reservation along with the exportation documents.
- Manage directly export processes, such as inspections, transportation, etc.

04 LATINA TECH _ Data Sheet

Properties	Unit	ASTM	Result
Material	-	-	LLDPE (Linear low-density polyethylene)
Weight	gr/m2	-	90
Color	-	-	Transparent (milky)
Dimensions	cm	-	130x75cm
Oxygen Gas Transmission Rate (OTR)	cm3 /(m2 - 24hr-atm)	D-3985	1 928
Haze	%	D-1003	2417
Electrical Resistance	Ω	D-257	2.8×10^3
Volume Resistivity	$\Omega\text{-cm}$		1.2×10^2
Tensile Strength	N/mm2	D-882	36
Elongation	%		853
Appearance	-	-	Normal
Density (@23°C)	g/cm3	-	0.92
Reusable / Recyclable	-	-	Yes

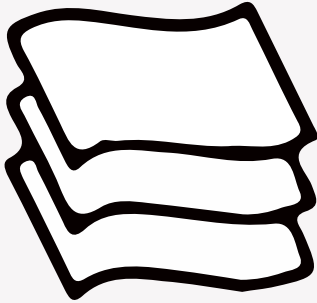

PREMIUM
HERMETIC BAG

04 LATINA TECH _ Composition

ECO-FRIENDLY SOLUTIONS!

04 LATINA TECH _ Benefits

1

LAYERS

More thickness,
more protection.

2

SEALING

Triple heat sealing,
more resistance.

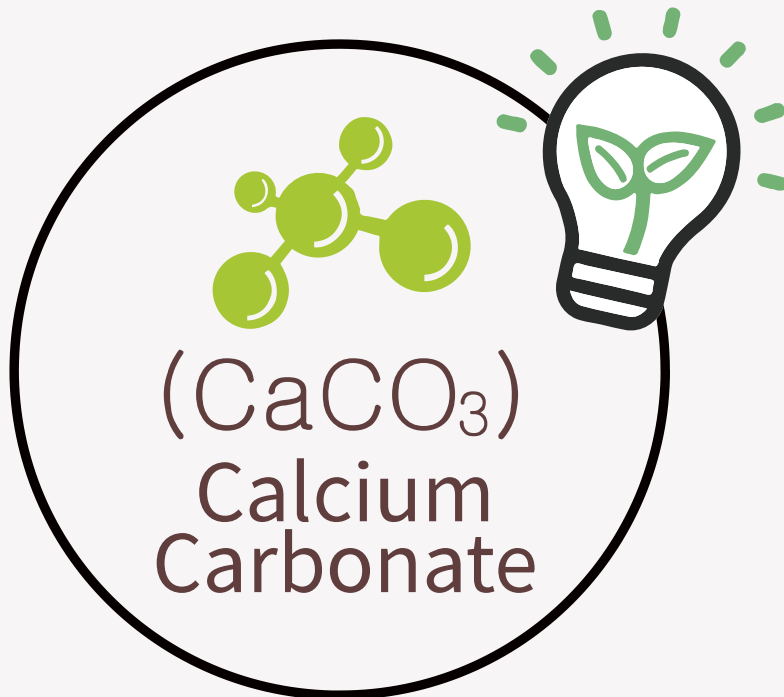

3

ENVIRONMENTAL AWARENESS

Eco-friendly.

04 LATINA TECH _ Benefits

It is a product with environmental awareness. In addition to being reusable, thanks to the addition of **Calcium Carbonate (CaCO_3)** to the bag's compounds, it can decompose through thermolysis process, thus helping reduce the impact of plastic in nature.

While small quantities of Class 1 ODCs may be present in standard refrigerant compressors and chillers used in the production plant, these systems are completely sealed and any contact of these materials with the product would not be expected. This use of Class 1 ODCs is considered incidental and is therefore exempt from labeling requirements.

05 PHOTO RECORD _ Quality Control

05 PHOTO RECORD _ Quality Control

The background of the slide features a blurred image of a person's legs and feet walking on a light-colored floor. Overlaid on this is a large, stylized line graph with two lines, one red and one blue, both trending upwards from left to right. The lines are thick and have a hand-drawn or chalk-like appearance.

Thank you!
