- We **provide effective solutions** at each step of the process to help you navigate your business's challenges.

- Our team of outsource/out-staff professionals will work with you toward **one shared goal – a great product**.

200+ professionals

computer scientists, software engineers, UX/UI designers, project managers, business developers, DevOps, marketers, entrepreneurs

ave 10+ years experience

Who we are

MALVAS

MV Risk Modeling Solutions
is a team of experts in cargo loss prevention

excellent service

in software technology, risk prevention, assistance in operations, portfolio analysis, and risk consulting

global partnership

- We provide solutions that cover the security of the **entire logistic chain**.

- Our organization provides **security**, **efficiency**, and **confidentiality** for our clients.

- Our global parnters provide us **hardware technology**, **security tools**, and **tracking devices** to better meet customers' needs.

Together we are stronger!

Malvas and MV Risk Modeling joint forces and expertise for providing IT solutions in Risk Management for the Logistics industry

We create interfaces for joining in one screen multiple platforms (TMS, CRM, ELD, GPS), Risk Registering Sheet & Sharing Indicators.

Our platform shows
Current and Forecasted level of effectiveness of protection systems.

A new Platform of Risk Analysis developed according to routes used, type of cargo, drivers score, type of truck, PTO, Utilization reports along with Ifta, Trips, Geofence, Speed, Low Battery alert, dangerous areas, facilities support for truck stops, idle time, etc, by balancing Risks x Vulnerability.

Risk management in logistics allows you to remove negative losses:

- Failures and accidents of work machines or vehicles.

- Problems on finding spare parts for work machines or vehicles.

- Air and road **conditions preventions**.

- Unplanned fuel calculation on vehicles.

- Loading in non-compliance to the **specifications** of the products.

- Burglary incidents on **loading** or during **transportation.**

- Failure to comply with **laws** and **regulations**.

- Staff performing transportation activity **affected by**: physical problems, mental stress or lack of resting.

- Providers **exposed** to financial difficulties.

- Incorrect **documents** used in the operation.

- Problems arising from **information** technologies.

Risk management in logistics

Ensures you that effective decisions are taken in:

- Efficient use of **time**.
- Prevention of **resource's** waste.
- Effective management of **risks**, ensuring the most appropriate earnings.
- Offering opportunities to follow **innovations**.
- Financial protection of the business, **ensuring stability**.
- The protection of the operator's image.
- Clear management understanding.
- Providing **growth** and **development** in the operator's market.
- Development of internal auditory.
- Measuring the increase of employee's business **consciousness** level due to internal auditory.

Risk management solution App

Choose the optimal route for the movement of vehicles taking into account the professional level of the driver, the number of accidents and thefts, accounting for repair work and the quality of coverage

Make rational decisions to prevent economic losses and make a profit using **software product that integrates with various data sources**

Optimal route calculation

Route	Warsaw Berlin Paris Kyiv	+ −
Route	Warsaw Berlin Paris Moscow	+ −

Driver rate	0.00$	354

Estimated revenue	0.00$	1000000

Cargo type	Machinery	▾
