# Case Studies

# UX strategy case study:

An Employment Management System focused on the citizen

# An Employment Management System focused on the citizen

Through agile, collaborative methodologies and Design Thinking we ideated an employment system accessible for everyone. During the process, we helped to implant the citizen centered approach in these government institutions.

## Services

- User research
- Service Design
- UX Strategy
- Prototyping

# Drupal case study: World Pulse

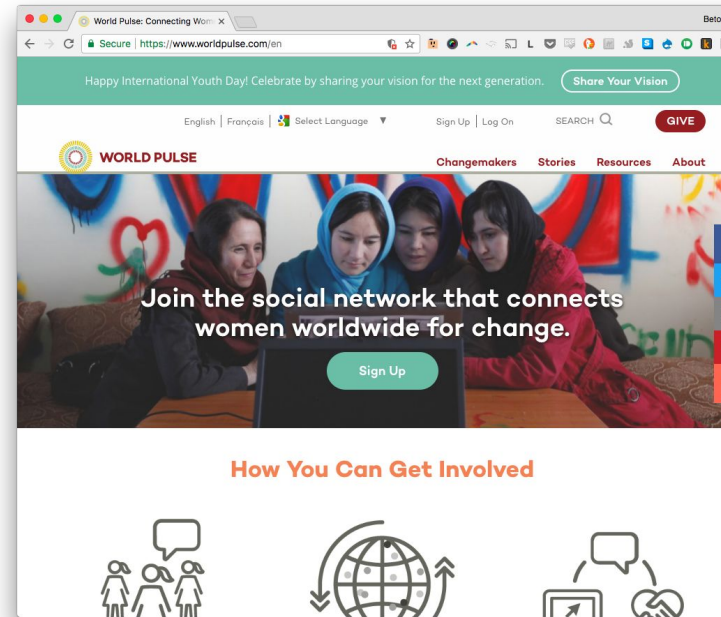

# Drupal case study: World Pulse

We work with [World Pulse](https://www.worldpulse.com/en) to innovate and enable their network to do good for women. We help them **strategize** and **implement** their **Drupal site**, since 2016.

## Services

- UX Strategy, research and prototyping
- Continuous Integration implementation
- Drupal development
- Security and maintenance
- Continuous enhancement

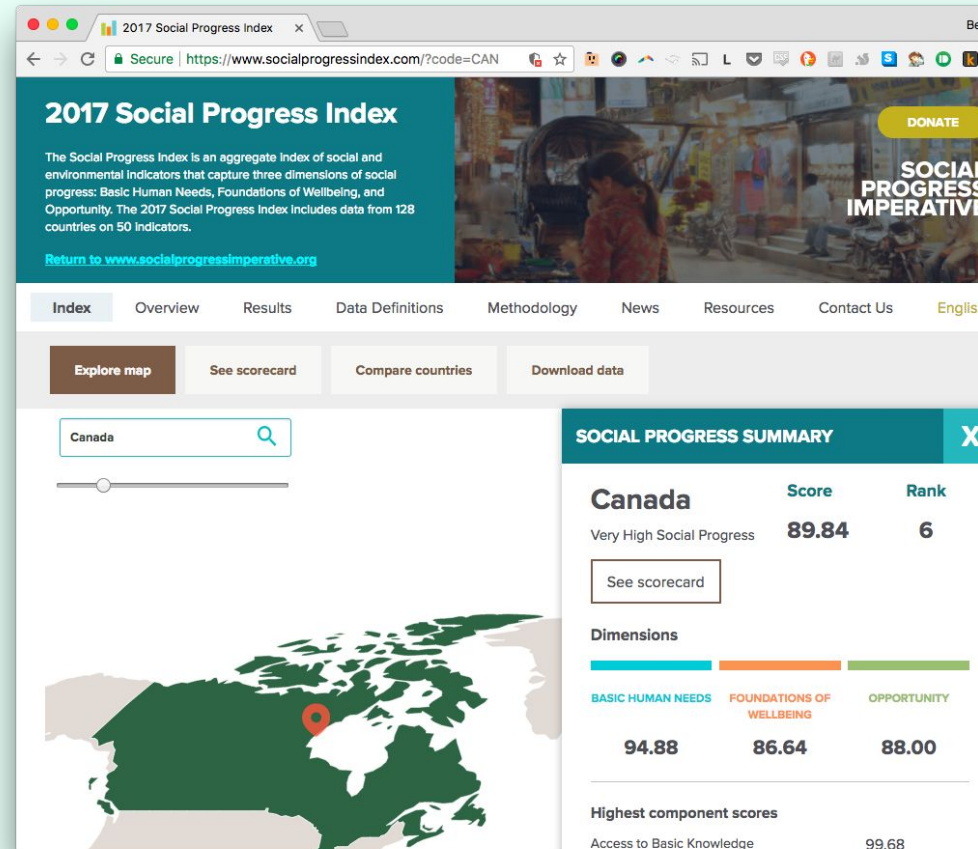

"Manatí has proven to be a trustworthy company capable of a great delivery of their services, bringing value to our organization through the development of our core product, working hand in hand with our internal development team."

*Ann Ann Forsthoefel*  
COO, [World Pulse](https://www.worldpulse.com/en)

# Web development case study: Social Progress Index

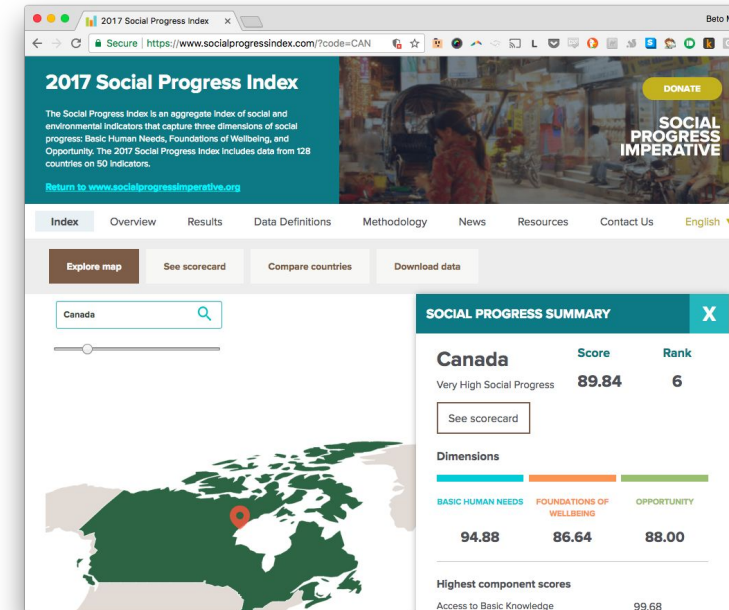

# Web development case study: Social Progress Index

For the 2017 release of the Social Progress Index we strategized and built a dataviz site, to empower decision makers and social entrepreneurs through the use of data.

## Services

- UX Strategy, visual design, research and prototyping
- Dataviz
- MEAN stack development (Mongo DB, Express.JS, Angular.JS, Node.JS)

"Manatí excelled in communication, management and development of the project, towards our deadline. Their execution during and post launch of the product has given rise to great results. Manatí has a great future, they already have global quality in the delivery of their services."

*Abi Weaver, Global Director, Marketing and Communications*

**Consulting and training**

**Support and Continuous Enhancement**

**Security and Maintenance**

# Consulting and Training

We've trained hundreds, to empower them and own their websites.

The #1 business school in Latin America. We trained them so they can build new functionality and create custom pages they need, using the framework we built with Drupal 7.

Spanning more than 100 sites in Drupal, the University of Costa Rica needed to train its maintainer force in Drupal 7 for security, maintenance and enhancements. Also, to learn about Drupal 8 in order to work in the upcoming migrations.

# Consulting and Training

We've trained hundreds, to empower them and own their websites.

The leading technology institute in Costa Rica and Central America, migrated its site from Sharepoint to Drupal, leveraging in our knowledge in higher ed. We trained their team in infrastructure, drupal, git and continuous integration.

IICA migrated its site from Sharepoint to Drupal with the help from our team, to leverage the cloud in Pantheon.io. The multilingual portal contains is maintained in house, we trained their team in migrations, module development and git.
