- Consulting and Training
- Support and Continuous Enhancement
- Security and Maintenance

# UX Strategy and Design

# UX Strategy and Design

If we see the experience as leverage to create competitive value, we'll have happier users.

Happy users are good for business.

We like **collaborative processes**. They give us a relevant, panoramic view and highlight the most important elements in the strategy of the organizations we work with. We use **research** to **break** department silos and encourage **horizontal conversations**.

We **make visible**, what **otherwise would be invisible**.

# UX Strategy and Design

1. User Research
2. User Testing
3. Information Architecture
4. Prototyping
5. Content Strategy
6. Content Audits
7. Competitive analysis
8. Design systems, style guides
9. Visual design production

## Some tools we'll use with you:

1. Affinity diagrams
2. Service location planner
3. Service blueprint
4. Customer journey mapping
5. AB testing
6. Competitive analysis
7. Inventories / audits
8. Design Studio Workshops
9. Design Sprint Method

# UX strategy case study:

An Employment Management System focused on the citizen

# An Employment Management System focused on the citizen

**Client:** ILO / MTSS (Ministry of Labour and Social Security of Costa Rica)

Through agile, collaborative methodologies and Design Thinking we ideated an employment system accessible for everyone. During the process, we helped to implant the citizen centered approach in these government institutions.

## Services

- User research
- Service Design
- UX Strategy
- Prototyping
