Innovate3

ABOUT US

1) WE INNOVATE. We understand that, while it is important to have a wholesome and balanced diet, it is just as crucial to make it appetizing. This is why we focus on value-added products: functional, natural and delicious. We have won an award for innovation in entrepreneurship from Peru's Ministry of Production.

2) WE PROMOTE Peruvian Superfoods as the basis of a healthy lifestyle. We believe that highly-processed, mass-produced foods with little nutritional value are on their way out and we are happy to be at the vanguard of this new paradigm change. Moreover, we focus on making these products affordable, so that they reach a wider consumer base.

3) WE SUPPORT organic farm communities prosper by paying them a fair price for their products and by giving them constant incentives to improve the quality of their processes and final products. We provide them tools so they can develop organically and sustainably. This is by far the most rewarding part of doing business in our company.

WHY US

HIGHEST STANDARDS OF QUALITY

We care.

We go directly to the source to guarantee traceability. We use one-of-a-kind quality control measures at every step of the export process.

PRODUCT DEVELOPMENT

We are flexible.

We will work alongside you to develop value-added products catered specifically to the needs of your consumers.

PROFESSIONALISM

We are proactive.

We understand that communication is the key to develop long-lasting partnerships. We are also committed to hard work and compromise.

The First of Its Kind!

As creators of Nanax, we were awarded the “Innovative Entrepreneurs” award by Perú’s Ministry of Production.
