Case Studies

TITCS

Helped our client in building UI/UX of their product mobile application and attract their customers to purchase that app for their business. Nanotech built feature consisting of Video recording, document scanning and human liveness validation.

Consumer-Centric Loyalty Platform

To help our client in attracting thousands of new members each month, nanotech built a feature-rich cinema platform consisting of cinema management, POS, and online ticketing. This platform gave the management access to a real-time dashboard, automated reporting, easy film scheduling, fully customizable box office, restaurant catalog, and stock levels into novel revenue streams.

Honda Motorcycle

Our client is running a world focused automobile industry with the manufacturing of 2 wheelers and 4 wheelers. Nanotech developed a on demand customized app for them in which they can plan the number of parts required to manufacture 10000-50000 bikes. Along with parts generation, system was focused on complete process of delivery of that parts in premises.

Award

Komal Mutreja

Founder & CEO

Today, the human race is closely associated with technology more than ever before! Tech adoption has now become the key determiner of business success, and all enterprises are in need of

the first employee and setting-up the brand presence by gaining trust. Creating an identity and gaining an initial market traction is important yet difficult. However, in a short span, we could build a strong relationship with clients and partner with global firms from the US, Nigeria, Australia, and Brazil. While hoping to grow more, I would like to say that it is a journey of continuous learning and is interesting so far.

What opportunities do you foresee in the current IT industry and how are you framing your company to achieve sustained success in this domain?

In this age of technology, we are bound to rely upon digitization and automation. Artificial Intelligence, Cloud technology, the Internet of

to refunding the cost if they aren't satisfied with our services. Our project delivery process is backed by continuous feedback and assessment after each small deliverable. This is known as Agile/Scrum Methodology that makes our and our client's operations seamless.

Brief us on the professional experiences you look for while hiring candidates?

I truly follow Bill Gates saying, "Age and experience are less important than their enthusiasm for work and their belief in making computers more accessible for the average person". At Nanotech Soft-App, we follow the same strategy to hire our employees. I see the passion, enthusiasm, energy, way of thinking,
