Let's grow

Our **Team**

Sergio Sobek
Executive Partner

Sebastian Lavena
Operations Partner

Agustín Baretto
Business Partner

Alicia Mogliani
HR Manager

We founded Neginet in 2012 with one sole goal in mind:
to help other companies grow by augmenting their teams.
Today we are **25+ Engineers**, spread across **3 cities**
with clients within **USA and Canada.**

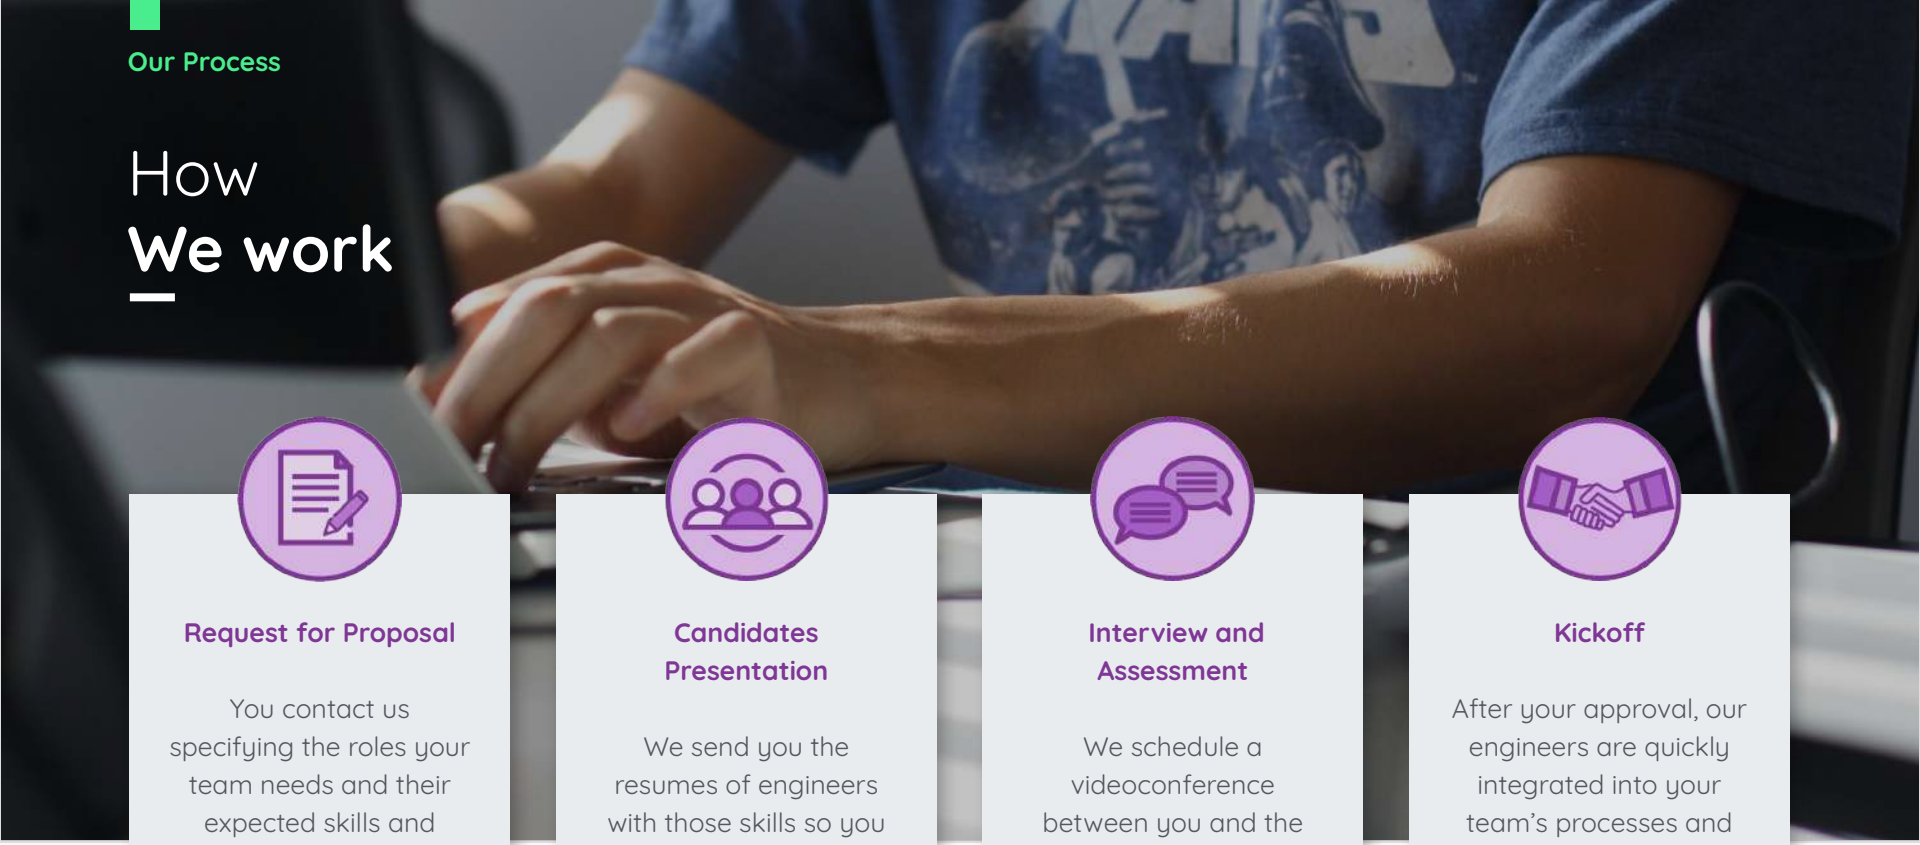
Your company goes first

Neginet takes care of **recruiting, interviewing, hiring and managing top talented engineers** so you can spend more time focusing on what really matters to your business.

How can we help your team grow today?

Our Process

How **We work**



Request for Proposal

You contact us specifying the roles your team needs and their expected skills and technologies.

Candidates Presentation

We send you the resumes of engineers with those skills so you can choose the ones that best fit your search.

Interview and Assessment

We schedule a videoconference between you and the filtered candidates so you can know them better.

Kickoff

After your approval, our engineers are quickly integrated into your team's processes and work alongside your own staff.

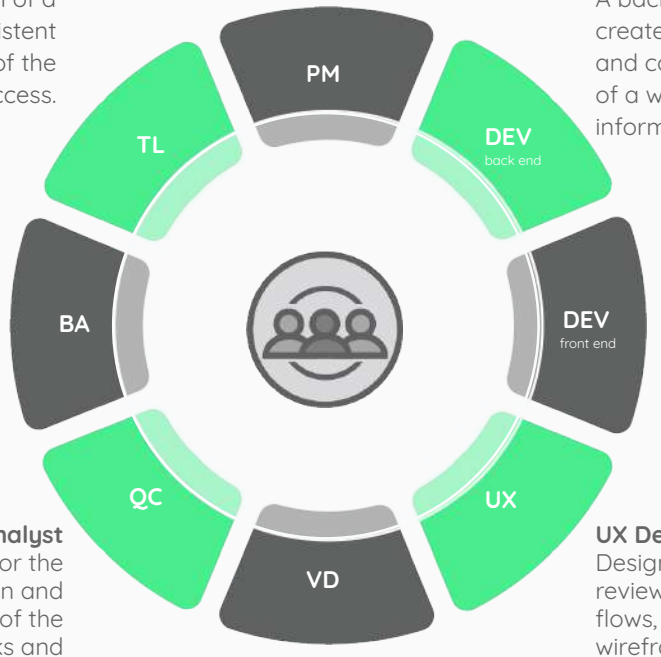
Team Roles

Multi-talented teams that enhance and boost **software experiences.**

Project Manager
Coordinates the team through the project. Point of contact with the client stakeholders.

Tech Leader
Assures the creation of a clear and consistent technical vision of the project to ensure success.

Back End Developer
A back-end developer creates the logical back-end and core computational logic of a website, software or information system.



Business Analyst
Defines the product needs and vision, business scope and quality of the product scope.

Front End Developer
A front-end developer codes and creates the visual front-end elements of a software, application or website.

QC Analyst
Responsible for the definition and implementation of the quality frameworks and solutions.

UX Designer
Designs the experience, reviews and proposes flows, sitemap and wireframes.
.

Visual Designer
Creates and distributes visual UI mockups to validate the app UX.

Devops. & Infra
Spinnaker
TERRAFORM
docker
amazon webservices
Google Cloud Platform
Microsoft Azure

Why **choose us**

Similar Timezone

Nearshore outsourcing to Argentina helps eliminate communications obstacles. Argentina's timezone is very close to EST.

High Quality

Argentine universities are recognised around the world for their highly skilled graduates. Our thorough recruiting process focuses on hiring only the best candidates.

Fluid Communication

Argentina has the highest English level in Latin America, and currently occupies the 15th place in the global ranking. Multilingual skills is a key factor for foreign companies to work with us.

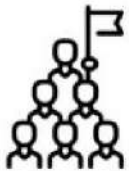
Why **choose us**

Cost-effective

By hiring remote workers from less inflated labor markets, you can pay even half the rate per hour you would pay in cities like San Francisco or London for the same quality of work.

Flexibility

By using staff augmentation, you can ramp up the intensity of your staff's work output when needed.



Bigger talent poll

Engineers are a scarce resource today. Outsourcing remote workers from other countries means you can hire the best, regardless of location.
