

# NeuralActions

Collaborative Artificial Intelligence

## Our current goal

We seek to grow in:

- Collaboration with health professionals and institutions related to cognitive dysfunction
- Presence and strengthening in the Spanish and European market.

Did you know that emotions generate permanent memories?

What if we could connect our **emotions** using **artificial intelligence**?

Emotions etch memories in stone

## Our proposal

How do we do it?

**We build a new form of  
personalized and  
collaborative cognitive  
therapy.**

Why do we do it?

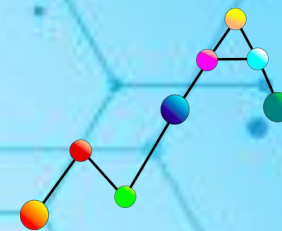

# Memories

## Scalable options

Our proposal provides access licenses at no cost to families to reach everyone:

Free	Professional	Teams	Corporate
2 boards to share with 3 users.	10 boards to share with 10 users	20 boards to share with 40 users	High-volume storage needs
For families who want to share memories and interests.	For independent professionals.	For professional teams seeking agility in more comprehensive treatments.	For organizations seeking institutional-level treatment management

\* Memberships by users and by month

\* 1 Board for each Patient

**We are official sponsors of your memories**

**Because we believe that they are worth and  
excite.**
