

We work with natural oils and butter, extracted directly from the seeds and native fruits from the Amazon forest, with minimal processing, in order to guarantee the integrity of the nutrients and the quality of the ingredients for the market we serve.

Our portfolio presents a great variety of species destined to cosmetic applications, for the most part, corresponding with the growing world demand on the inputs of the Amazonian biodiversity.

The raw materials used for manufacturing of oils and butters we commercialize are largely harvested in the Amazonian region by small producers and are, in turn, processed by local industries, close to the extraction areas, thus giving greater quality and authentic products.

OILS AND BUTTERS OF THE AMAZON

OUR PRODUCTS

OILS *

Buriti oil - *Mauritia flexuosa*.

Buriti is a traditional fruit from the Amazon region that has many benefits with regard to the treatment of hair and skin. Buriti oil is extracted from its pulp, and its use ranges from the cosmetics industry to the food industry.

Acai Oil - *Euterpe oleracea*.

Oil rich in phytosterols, anthocyanins and essential fatty acids, in addition to flavonoids, free radical fighters responsible for slowing aging. In addition, its properties involve anti-inflammatory actions, being much used in cosmetics and in medicinal products.

*Oils obtained by the cold pressing process.

OUR PRODUCTS

OILS *

Andiroba oil - *Carapa guianensis*.

Andiroba oil is well known for its ability to repel and protect against biting insects when rubbed by the body. It can also be applied directly to the joints to relieve the pain of arthritis and rheumatism, but that's not all. Andiroba oil has indications for: healing wounds, reducing pain, reducing inflammation, relaxing muscles (like massage oil in massage sessions), etc.

Babacu oil - *Orbignya oleifera*.

Rich in nutrients, the babacu oil that is extracted from the seeds of Babacu can offer several health and beauty benefits. The same is used for edible purposes and for the manufacture of cosmetic products for capillary and skin application.

*Oils obtained by the cold pressing process.

OUR PRODUCTS

OILS *

Brazil nut oil - *Bertholletia excelsa*.

Brazil nut oil is considered as a potent lubricant and emollient, thereby preventing premature aging of the skin. In addition, it promotes hydration of the skin as it contains substances that makes it softer and prevents evaporation of water from the skin.

Copaiba Oil - *Copaifera Officinalis*.

Because it is an evident and powerful anti-inflammatory and natural antibiotic, copaiba oil is indicated for the relief of muscular pains, activation of the circulation, detoxification of the organism, antiseptic, expectorant and etc. In addition, copaiba oil is also very suitable for capillary and epidermal treatments.

*Oils obtained by the cold pressing process.

OUR PRODUCTS

OILS *

Passion flower Oil - *Passiflora edulis*.

Passion fruit oil can be a strong fighter to sagging skin thanks to its omega 3, 6 and 9. In the oil are still present antioxidant substances, which help prevent premature aging of the cells. It is indicated for use in products for application to the skin.

Ojon Oil - *Elaeis oleifera*.

Extracted from the nut of a palm tree named Ojon, it is a powerful asset in restoring the hair lines. It has protection against ultraviolet rays, besides containing lipid and cysteine which is very emollient and therefore very used for hair treatments.

*Oils obtained by the cold pressing process.

OUR PRODUCTS
