TECDE Ingeniería

Data acquisition, transformation, and prediction to make the best decisions in your business.

The Growth issue

Business growth leads top executives to distance themselves from daily operations and rely on data to make decisions, yet the increase in the quantity and complexity of data slows down and complicates decision-making.
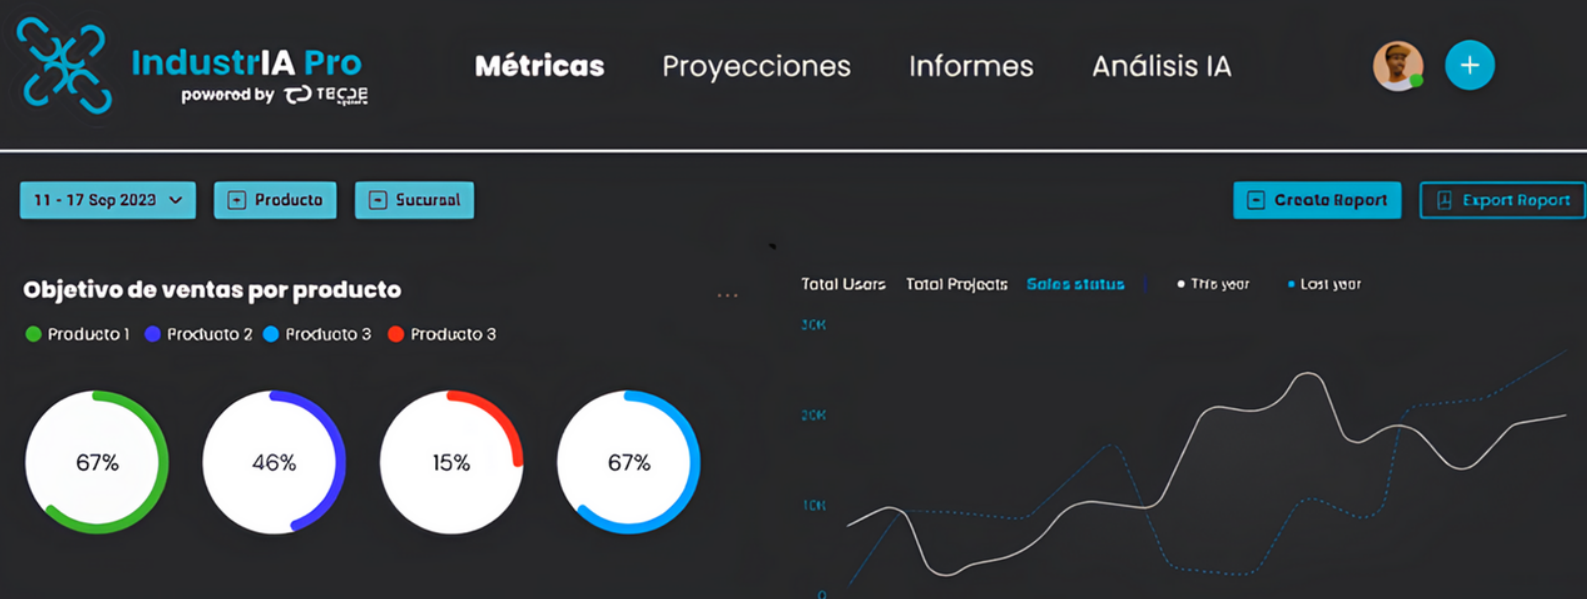

More growth, more data, more variables, more difficult decisions.

Your own data analyst in your pocket

IndustrIA Pro
powered by TECDE Ingeniería

- ✔ Machine learning algorithm for projecting business behaviors
- ✔ KPIs, data, and OKRs visualization dashboard
- ✔ Notifications, alerts, and valuable insights explained in natural language
- ✔ Performance report and data analysis in natural language
- ✔ Connection to any structured SQL data source
- ✔ Mass data importation
