Why us?

With **15+ years** in the industry and more than a decade of successful partnerships with **companies** like InComm, we help them to identify problems, plan, develop and maintain solutions as if they were our own.

We offer **comprehensive services** beyond development. This includes strategic planning, infrastructure support, **PCI certification assistance**, and dedicated product managers and owners to ensure each project's success.

FAQ's

How do you help different type of clients?

How big are the projects you've worked on?

Our clients trust us with projects handling thousands of TPS, scaling up to 10x during peak days. We connect stores, merchants, and processors worldwide.

How long do you stick around?

We believe lasting partnerships make all the difference, allowing us to become part of your culture and deeply understand your challenges to deliver the best solutions. One of our most valued clients has trusted us for over 10 years.

How many partners and clients do you have in the U.S.?

Our philosophy is to focus on a select group of direct clients and partners, allowing us to build long-term, win-win relationships. A prime example is InComm, with whom we've developed a strong, ongoing collaboration.

What is your specialty?

We specialize in payments, seamlessly integrating with both new and legacy systems. We offer solutions for every step of the process, taking ownership of your challenges and collaborating closely to plan, build, and maintain the ideal solution.

How big is your development team, and how long have they been together?

A team of 60 skilled engineers and analysts with diverse tech expertise and an average of 4 years working together—dedicated to continuous improvement and exceptional client service.

Have you ever taken over an existing project that was going badly?

Yes. Wherever you are, we can swoop in, integrate and work together. For example, company wide HSM brand migration (Hardware Security Module for cryptographic operations, like key creation and rotation for PCI compliance)
