

PRODUCT CATALOG

Floema started its activities in 1993 manufacturing and commercializing natural honey and compound with propolis. In 2001 he started export of these products to the North American and Japanese markets. In 2002, it started exporting honey in bulk, reaching, in 2006, the 3rd place in the national export ranking.

In the North and Northeast regions of Brazil, **it was the pioneer in the production of honey composed with propolis and plant extracts of medicinal plants** and, also, in the launch of sprays with propolis and plant oils medicinal. Today the company manufactures sprays that have excellent flavor and high antiseptic power.

Floema's honey is **produced within international standards**, using the most modern technology with equipment automated without human contact, using the best in raw material resulting in very high quality products.

At the beginning of 2006, it inaugurated a new and wide headquarters in AQUIRAZ-CE with modern equipment that increased production 30%. A distribution center was created in the city of São Paulo to serve the South, Southeast and Center regions more quickly and efficiently West.

The company's focus is to keep growing, investing in technology and diversification of products, always consolidating in a consistent with the philosophy of quality and innovation.

Excellence in production, commercialization and professional integrity guarantee Floema and its resellers relationships long-lasting and great partnerships based on mutual trust.
