Repair PITOT PROBES 0851 Series

UTC Aerospace Systems is at the forefront of air data technology - researching, designing, manufacturing, qualifying and supporting custom air data solutions.

Features & Benefits

- Robust design
- Proprietary wire heater design
- De-icing capability
- High reliability
- 28 VDC and 115 VAC options

The robust design of our Pitot probes relays vital information for aircraft flight control by providing highly accurate Pitot pressure measurement over a wide range of angles of attack and airspeeds even in extreme icing conditions. Pitot probes have demonstrated success around the world on the majority of aircraft types in operation.
