

InnoBUS

InnoBUS will be your ally in the business resources planning and optimization of your business' executive processes.

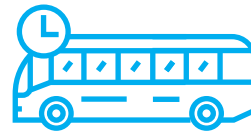

It will permit you to make assertive decisions that will positively impact the growth and performance of your passenger transport system.

InnoBUS

InnoBUS *Masive*

It will easily control the accomplishment of your fleet's services generating schedules automatically, optimizing the operation effort by programming only the required vehicles.

InnoBUS *Colective*

If you count with an adequate distribution of your fleet, you will be able to program different routes, avoid vehicle accumulation on a single spot of the route, and supply the transportation demand.

InnoBUS *Intencity*

Be informed of the path followed by the drivers in and outside the city. You will be able to define control zones to conduct closer tracking of the daily operation.

You will know the vehicle's occupancy all the time and reduce the risk of having inspectors at the edge of the highways.

BUILD YOUR SOLUTION:

InnoBUS Control

Establish bidirectional communication all the time with each vehicle of your transportation fleet.

InnoBUS Human Resources

Manage the different phases of the hiring process, training, and personnel tracking.

InnoBUS Counting

Collect the data of your fleet's mobility and assess the effectiveness of each of your routes.

InnoBUS Maintenance

Manage your company's resources effectively and take advantage of the available spaces to execute your maintenance plan.
