DATA CONVERSION

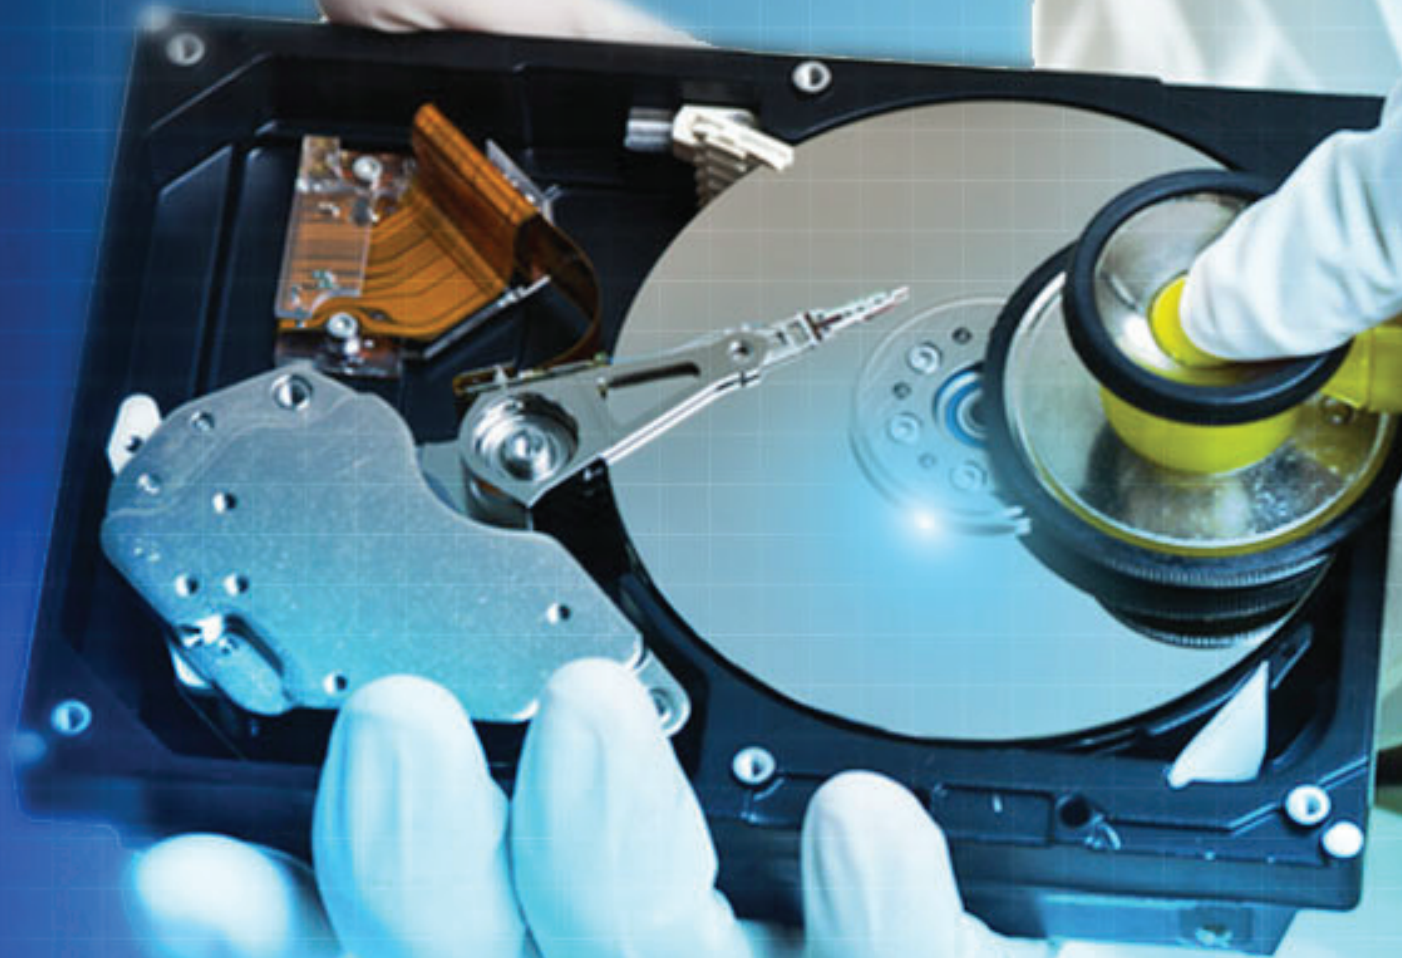

DATA CONVERSION

We have the knowledge, experience and latest technology to migrate information from obsolete storage media to the latest technology of storage media and migration of information to new versions of data.

We have secure facilities, CCTV, audited processes and people specialized in data recovery and data conversion to ensure the security, confidentiality and integrity of your information and your devices.

Benefits

- Having information in updated storage media.
- Dramatic reduction of physical space to storage magnetic media.
- Comply with all the law and institutional regulations that enforce public entities and companies to preserve their information.
- We support tapes created with any system: Wang VS, IBM DOS/VSE, VM/SP, MVS, I Series, Z Series, UNIX, VAX, Linux, HP 3000, MPE/IX, Windows, MAC, etc.
- We convert any type of magnetic device (tapes, discs, diskettes, ZIP drives, etc.).
- Lower costs of custody, transportation and storage.

DATA RECOVERY

DATA RECOVERY

Our specialized personnel and laboratory with the latest technology tools allows us to retrieve information from any storage media.

We guarantee the confidentiality of your information and the integrity of your media.

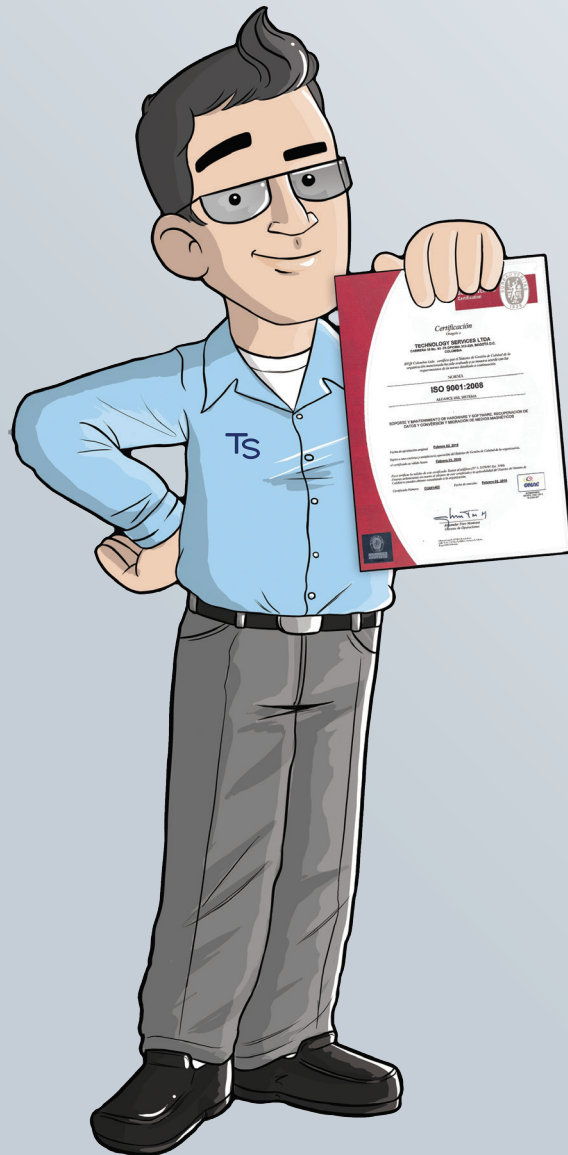

We support ALL devices.

Which are the common failures?

- Power failure: data in the volatile memory will not be stored on the permanent memory.
- Hardware failure, such as damage to the hard disk platters. Software damage, data won't save.
- Business failure, when data is stored with a vendor using their software as a service and data escrow has not been provisioned.
- Data corruption, such as system file corruption or database corruption.
- Software error or poor usability, such as not confirming a command to delete a file.

IT OUTSOURCING

IT OUTSOURCING

Our team of professionals have Microsoft System Engineer certifications in Windows Server platforms and specialized services in Windows, Linux and Cisco platforms; those skilled in preventive and corrective maintenance of hardware and operating software have Cisco certification of CCNA, COBIT and ITIL.

- Optimize your work capital when defining temporary budgets.
- Fits the business size and needs.
- Does not require a technical department because we offer full support and maintenance anywhere you need.
- Avoid the high costs of technology upgrades that require all the computer equipment.
- Get corrective and preventive responses at the time required and before any type of eventuality.
- You get the experience and support of Technology Services Ltda. a company that since 2000 has been implementing this service successfully in most of the best companies in all sectors.

DATA WIPING

DATA WIPING

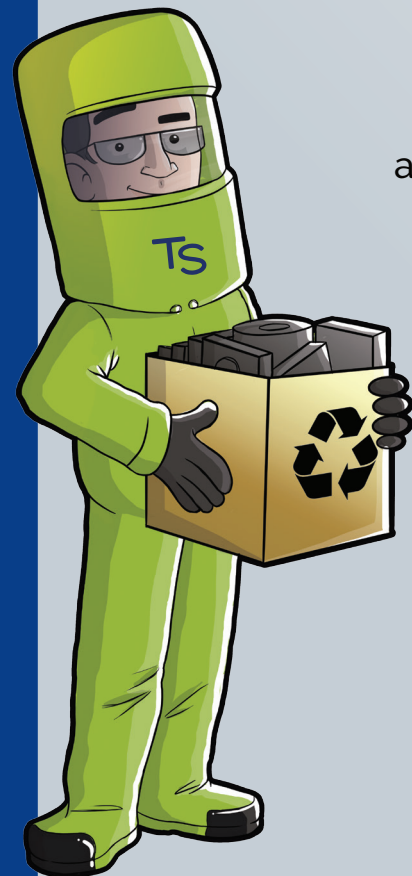

Deleting files and formatting storage devices is not enough to guarantee that the information stored is permanently erased.

In Technology Services Ltda. we are aware of the risk of information leaks that this may imply for businesses and individuals, so using applications with advanced technology, we delete all data certifying that they are destroyed in a completely safe and definitive way.

These applications meet the rigorous standards of the US Department of Defense.

Magnetic media destruction

- Transportation, destruction and waste disposal for magnetic media in an environmentally responsible way.
- Currently obsolete magnetic media generates waste that is considered cause of environment and health risk. These waste generated from the migration of the information contained in the magnetic media to new storage systems, establish an environmental issue of particular importance due to its ever-increasing amount.
- In Technology Services Ltda. we work closely with our clients to develop new strategies, plans and programs to provide the most appropriate destination to the waste generated according to their characteristics, quantity, volume and components.

SOFTWARE PURCHASE

SOFTWARE PURCHASE

We advise our clients with all aspects of software legalization quickly and easily, providing the best option to suit your company and your needs.

Risks for not using legal software:

- Software may affect the security of the company: with a virus intrusion, the entire network of your company may affect and expose all the information to be stolen and be attacked by hackers.
- Decreased employee productivity: employee should take time to solve problems related to licenses so that they don't stop working when the devices go to maintenance because of these problems.
- Legal risks: Using illegal software you commit a crime of the criminal code with imprisonment penalties up to 8 years and fines up to 1,000 minimum wages.
- No update privileges: It cannot be validated, you cannot perform downloads, obtain software patches or critical updates, creating serious problems of application compatibility and threatening your organization operation.

To learn more about the legal aspects and the use of legal software in Colombia read on Law 603 of 2000.

Electronic Negotiation Platform for Chash Purchase and Sale

For banks, foreign currency exchange offices, and automatic tellers, cash is a transactable commodity: some need to sell and some to buy, and significant amounts of bills are transacted on a daily basis.
