

**POTIVIAS**

SANEAMENTO BÁSICO, PAVIMENTAÇÃO E TERRAPLANAGEM

# Potivias Portfolio

Our company operates in the areas of civil construction (heavy), environmental sanitation, industrial cleaning and maintenance, telecommunications, electromechanical assemblies, with experienced professionals to maintain quality standards that result in full customer satisfaction.

The constant development to improve the quality of our services has resulted in solid growth in recent years.

# SERVICES

The services offered by Potivias include identification of customer needs, implementation and maintenance of the results of the projects developed.

This process can be divided into four steps:

## STEP 01 - IDENTIFICATION OF THE SITUATION:

Having identified a need, the process begins with a visit from Potivias customer to obtain detailed information of the situation. From this moment, a technical feasibility study will be carried out to indicate the most appropriate solution.

## STEP 02 - PROJECT DEVELOPMENT:

With the result of technical feasibility, the client hires Potivias for the development of the indicated project, including alternatives to meet the needs, as well as their respective cost / benefit ratio. With the information obtained and support from the Potivias Group, the client decides the best alternative for the final approval of the project and from this moment the review process will be initiated.

## STEP 03 - IMPLEMENTATION OF THE PROJECT:

In this phase, Potivias guarantees the implementation of activities contracted to implement the project within the deadlines and requirements previously negotiated.

## STEP 04 - MAINTENANCE CONTRACT:

For all projects, Potivias offers the client a maintenance contract, including regular preventive visits, in order to guarantee compliance with situations of preventive problems and agility in responding to corrective situations. The agreement aims to ensure the continuity of the operations of the implemented solution with performance standards, as required by the client.

***NOTE: The fact that it was presented the description of this process does not preclude hiring Group Potivias to perform services related to the field, such as putting the characterization and acceptance of products and / or services outside.***

# HEAVY CONSTRUCTION

- Earthworks including slopes, embankments, dykes and gabions;
- Topographic and geodetic works;
- Marine, river and Lake Dredging;
- Asphalt Paving in cobblestones, blokret, Portuguese mosaic, and concrete;
- Milling and pavement recycling;
