

Real Castanhas do Brasil

OUR STORY

The Real Castanhas do Brasil processing industry was founded on April 9, 2019, in the city of Iporá, State of Goiás, idealized by partners Márcio Fernandes Cunha Costa and Fernando Gomides Sampaio. Today we have around 60 direct and indirect employees.

We serve the domestic market with quality and efficiency in distribution. For that, we have distribution centers in the Midwest and Northeast.

QUALITY

We follow all sanitary protocols required by the Ministry of Agriculture, Livestock and Supply. We value good hygiene practices in all processes.

A tall, leafy tree with a thick trunk and dense green foliage, standing in a lush forest. The tree is the central focus of the image, with its branches spreading out against a clear blue sky. The surrounding forest is dense with various green plants and trees, creating a vibrant and natural background.

SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

By the socio-environmental responsibility, we generate more than 60 direct and indirect jobs.

Our raw material comes directly from the Amazon Forest through plant extractivism, thus contributing to the sustainability and preservation of nature, as well as to the region's economic growth and development.

AREA

The industry is installed in the city of Iporá\GO, Brazil. In an area of 1.440 m².

PRODUCTION

Our production capacity is 1,200kg of ready-to-eat nuts a day, packed in a vacuum aluminized bag, in 10 kg and 20 kg cardboard boxes.

Box that contains 10 kg and 20 kg of the product vacuum packed in an aluminum bag.	12 months*
*12 months from the manufacturing date, in the original packaging, respecting storage conditions. Once opened, must consume the product within 15 days.	

ADDITIONAL INFORMATION

Brazilian Nut (*Bertholletia excelsa* Bonpl) is an oilseed belonging to the family of Lecythidaceae, from the Amazon region. It is a large tree that can reach 50 meters in height. The fruits have a spherical shape, known as a hedgehog, that contains 12 to 25 seeds inside.

They have high nutritional value, on average 60 to 70% of lipids, 15 to 20% of proteins, 10 to 15,9g of carbohydrates, 7,5 to 7,9g of fiber and high content of methionine (essential amino acid).

It is considered the largest selenium source, available for human consumption, ranging from 0,03 to 512 ug. Selenium is very important for helping the immune system, hormones and against some types of cancer.

OUR VALUES

MISSION

Benefit and sell Brazil nuts, in addition to valuing the sustainability and preservation of the Amazon Forest.

VISION

Be a reference in the national and international market not only as a processing industry, but also trading and exporting company of Brazil nuts.
