ABOUT US

We are manufacturers and distributors of natural foliage.

Our company was created to offer foliage to the national and international markets, to all those companies and people dedicated to the elaboration of floral arrangements, decoration, wedding planners, decorators, among many others.

We support local economic development, we work side by side with farmers in the area.

Located in Vereda Goteras of the Municipality of Anolaima - Cundinamarca - Colombia

TYPE OF FOLIAGE WE GROW

- We provide two types of foliage for the national and international market, Ruscus (Ruscus aculeatus) and Brilliantine, these plants are ideal for use in a variety of settings, from interior decoration to the creation of landscape gardens.

► Brilliantine

Description: Glitter is a foliage, tropical cut, used to decorate flower bouquets or bouquets.

Main features: Length + 55cm

► RUSCUS

Descripción: Ruscus: It is an evergreen shrub that belongs to the liliaceae family and in its development emits long stems that easily exceed one meter in length

Main features: Length + 55 cms:

OUR CROPS

We work with qualified farmers, carefully taking care of the selection of seeds, pruning and pest control. Providing the superior quality of the foliage, guaranteeing the plants in optimal conditions.

FOLIAGE SALE MARKET

- ▶ We are solid suppliers of foliage in the national and international market, guaranteeing consistency in the offer and customer satisfaction from interior decoration stores to landscaping companies.

► Environmental Considerations

Reducing the use of plastic and promoting responsible irrigation practices, natural ponds, and sustainable greenhouses make us pioneers in the community.

► The Future of Foliage Sales

As awareness of the importance of plants and nature in our lives increases, the demand for foliage will continue to grow.
