# RIC Energy

Corporate Presentation

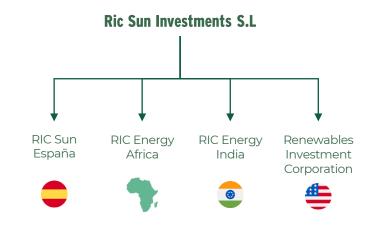

# **About us**

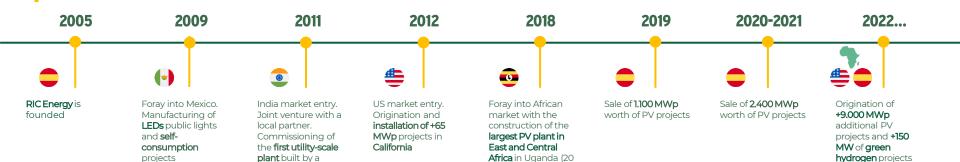

**≥** RIC ENERGY

- We started our activity in Spain in 2005, being one of the renewable energy pioneers in the solar PV market
- We are the leading independent PV developer in the Spanish market
- We have a global footprint in USA, Africa, Mexico, India and UAE

foreign firm

- Our purpose is clear: contributing to decarbonize the economy by providing clean and safe energy in the developed world and guaranteeing access to affordable energy in the developing world
- We have developed, installed and operated more than 5.000 MWp PV projects internationally

(aWM

# What we do

## **Our business scope**

Renewable projects origination

Origination of green hydrogen projects

Design of **energy storage** systems solutions

Project Management and Asset Management

# Our value proposition along all the project cycle

# **Project Development**

- Identification of strategic evacuation points
- Key sites control and registration management
- Permitting management. Direct access to relevant Public Administration Organisms
- Minimization of execution costs (CAPEX y OPEX)
- Social Integration projects

#### **Project Management**

- Detailed Engineering projects (electrical, civil and structural)
- EPC quality control.
   Implementation of rigorous checks from RtB to COD
- Permitting management of all the required licences to commission and connect generation plants. Direct Access to relevant Administration Organisms

#### **Asset Management**

- Admin, technical and contract management with all stakeholders involved during the exploitation phase
- Performance optimization of plants under management
- Control Center and leading software and protocols to detect, prevent and mitigate exploitation risks

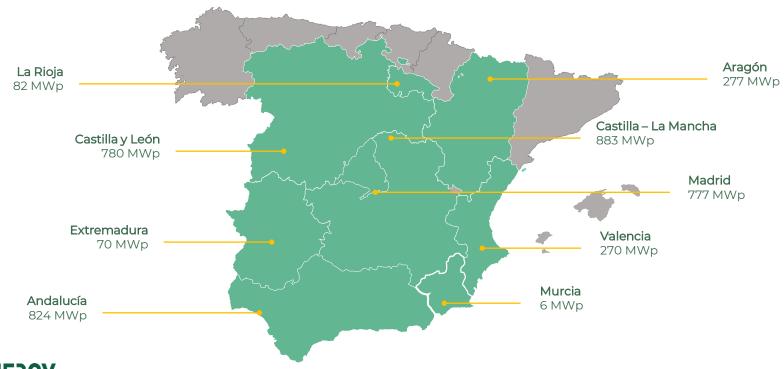

#### IPP

- Long-term property of renewable assets
- Equity investment own capital as well as co-investment with other partners
- Incubation and experimentation of incipient technologies in owned plants (storage, monitorization, etc.)

# Our projects under development in Spain

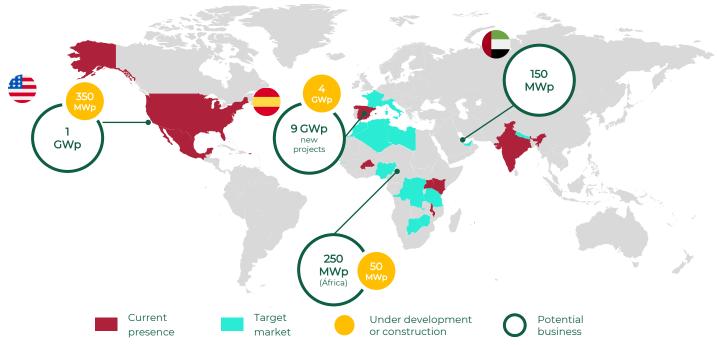

+4.000 MWp worth of projects with granted interconnection permits

# Our projects in other markets

We started our activity in Spain, and we are currently developing projects at an international level...
...with the aim of providing clean and affordable energy in both mature and emergent markets

# Spain

RIC Sun España S.L Paseo de la Castellana, 91 4ª Planta, Ofic. 4 28046 Madrid, Spain Tel: +34 910 886 320

## Africa

4th Floor, Ebene Skies Rue de L'institut Ebene, Mauritius

# **United States**
