About Vemplast

Present in the market since 2009, **VemPlast** is an industry specialized in developing products for the segment of industrial kitchens, domestic appliances and decorations.

We work with a differentiated design and besides the innovation, technology and originality, it is in the practicality of our ideas that we always bet.

Attitudes and novelties reveal our concern to be ahead, with new trends and concepts.

Mission, vision and values

MISSION

Our mission is to produce high durability and resistance utensils, meeting the highest levels of gastronomic exigency, creating value for our employees, clients, suppliers, partners and the environment, through a management based on sustainability and development.

VISION

Vemplast aims to operate in the gastronomic market with the goal of becoming a reference, with quality utensils, thus achieving customer satisfaction in relation to our brand.

VALUES

We prioritize transparency in our negotiations, the ecological position, the appreciation for lasting partnerships, the development of relationships based on trust, honesty, respect and humility towards our employees, suppliers, partners, clients and society, based on ethics.

Placement of Vemplast

We are pioneers in the segment when producing parts in Polypropylene and Polycarbonate, with virgin raw material, priming for the quality of the products.

Thinking of sustainability, our products exclude the use of disposables, have great durability and can be recycled.

Among our clients are industrial kitchens, hotels, restaurant chains, hospitals, schools and bars.

Vemplast Product Differentials

Entrepreneurship

Technology: We have the capacity to manufacture our own molds, using plastic injection technology, which ensures more agility and flexibility in the development of new products!

Services: We do not rely solely on technology.

Services are paramount because they allow a solid structure to be built, from service, to the delivery of Vemplast products, providing speed and quality.

Differences between Polypropylene and polycarbonate

Polypropylene

1. Endures from -10°C to 60°C
2. More economical;
3. No need to use disposables;
4. Various color options
to brighten your kitchen.

Polycarbonate

1. Endures from -60°C to 120°C
2. 250 times stronger than glass;
3. 100 times stronger than melamine;
4. 35 times stronger than acrylic;
5. High quality and durability.

Tropical Line - Polypropylene

The products of the **Tropical Line** are all made of Polypropylene, resistant material, which dispenses the use of disposables, contributing to the environment and generating a lower cost.
