

# What's our business?

Research and  
Development

Green Solutions

On & Offshore Solutions

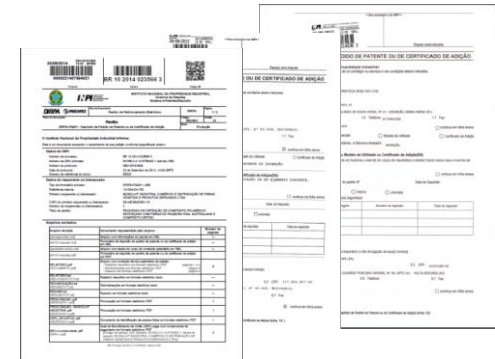

We develop new materials using renewable resources

Nowadays our researches are focused in develop products to our own business, but we're working in Open Innovation Model with some universities in Brazil to expand our performance offering new products to be licensed to our clients.

05 patents registered in 36 months

- Xaxim de Palmeira
- Biosolvit Absorber – Oil Absorption
- Inserting plant fibers in polymeric matrices
- Inserting plant fibers in orthotics
- Inserting plant fibers in ecologic water tanks

We develop products and new materials destined to solve environmental problems

Our products are destined to preserve flora

We do know how to take care of crop residues

We believe that nothing could be discarded in nature

And we believe when we're solving environmental problems, we're helping people to live in harmony with the environment

# Our products

 Natural flower pot developed with palm fibers \*\* which is discarded in the food industry

The truth substitute of *Xaxim de Samambaiaçu* \*

- High absorption of water and nutrients
- Tannin Free
- Ideal environment for plants development
- 100% ecological

 Natural substrate developed with the same palm fibers

The better substrate to use with Xaxim de Palmeira®

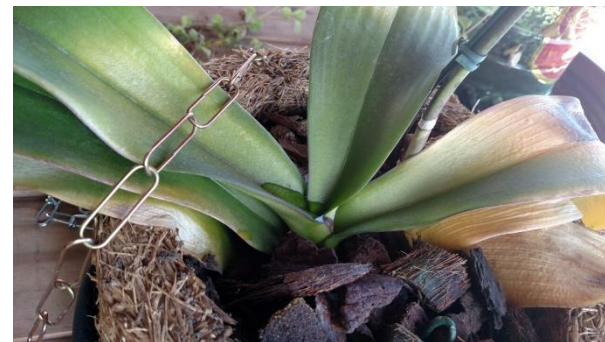

- Better aeration and it's very important to plants
- Tannin Free too
- 100% ecologic

\*Xaxim made with Samambaiaçu Plant today has its commercialization prohibited because there are risks of extinction of this specie

\*\* In Brazil we have 120.000tn of palm fibers discarded in food industry every year

Distribuidora Ltda.  
*Levando o melhor até você.*

We develop products to remediate oil contamination

Our products are destined to preserve water and environment where we live

We have two kinds of absorbers: synthetic absorber and natural absorber

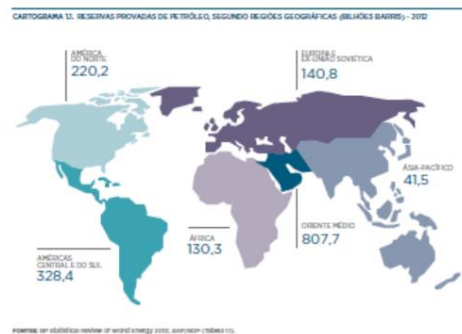

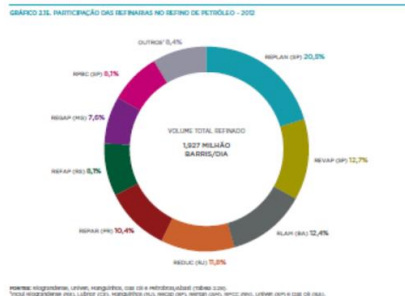

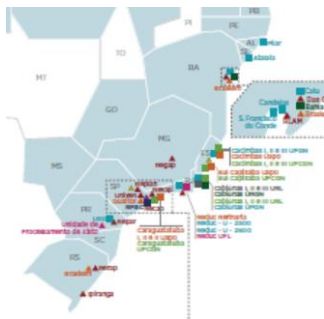

Our synthetic absorber is the most efficient synthetic absorber in the world and it's produced with poliuretane discarded by many industries around the world

Our natural absorber is 4 times more efficient than our synthetic, and it is made with the same fiber that we make our green products

## Differentials of Biosolvit Natural Absorber

- Designated to absorption of any oil derivate on and offshore
- First product in the world that allows the reuse of the absorbed oil
- First product developed from renewable raw materials
- First product in the world that provides carbon credits to customers
- Presence in the second largest region in the world in oil reserves

# Our products

## Absorption line with BBS and BBN

- 5" and 8" barriers
- 24" Offshore barrier
- Blankets, laces, pillows and filters
- BBS100 granulated absorber
- Kits for industry, ports and airports

## Containment line

- Fixed barriers
- 9", 12", 15" and 17" mobile barriers
- Customized barriers
- Repair and maintenance

## Our Clients

# Thanks

Thank you so much.

We hope that we can, personally, have the opportunity to show you what we can do and how much we can grow together.
