

September 2017

To whom it May concern,

I would like to take an opportunity and introduce our company, Club Omega Tree, that is involved in delivering high quality box lunch for kids from kindergarten to high school at lunch time made with our core product, Omega 3, because there are many studies looking at the association of fatty acid deficiency and neurodevelopmental disorders in children, and others which have proved that eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) are important for brain development and function.

The nutritious school meals not only have a positive impact on the health of students, but also in academic achievements. Healthy diets are key to reduce obesity and diet-related diseases, such as lack of energy and focus, obesity risk, chronic illness, and self-esteem and depression.

We created a special menu for kids, with fresh, handcrafted and state of the art ingredients like poultry, eggs and fish with high Omega 3 content, walnuts, green algae, flax seed, prebiotic soy drink, fresh natural juices, honey, etc. served on an appealing way that kids just love.

Through our own studies, we have had excellent results in the comprehensive improvement of children's health, improvement in school attendance and overall performance, even in children with conditions such as lazy bowel syndrome, attention deficit, bipolar disorder, autism and schizophrenia.

We would like to offer the services of our Company to USA and the rest of the World, because our commitment is to reach as many kids as possible.

We thank you in advance for your help and we will be glad to have more information and details about how we can reach your country with our services. Please, feel free to ask any questions relating to our offer that might be unclear.

Sincerely,

Luis G. Trejo Garcia
