E-commerce, Integrations ecosystem and Gateway payments

COMPREHENSIVE PLATFORMS, SEAMLESS INTEGRATIONS, AND SECURE PAYMENT SERVICES

- 01** Connecting e-commerce platforms with essential third-party systems
- 02** Integration with ERP, CRM, inventory management, and shipping providers

- 03** Multiple payment options to cater to diverse customer preferences
- 04** Streamlined operations, accurate data synchronization, and enhanced efficiency

Customer:
Paypal

Sector:
Money supply

Developed Project:
Platform integration

Innovation maturity:
High

Technologies:
Reactjs

Project date:
2019

Challenge

- Improve the integration process between e-commerce platforms
- Provide a better experience for the merchant, making the installation process easier and more intuitive.

Digital Solution

Development and maintenance of a new architecture for integrating payment methods with an e-commerce platform. Through fully transparent API.

This new architecture consisted of the development of an integration middleware that allows the card acquirer to customize only around 20% of the gateway structure in new integrations with e-commerce platforms.

Some of the technologies we work with

Mobile

- React Native
- Ionic
- Flutter
- Xamarin
- iOS
- Android

Database

- MySQL
- PostgreSQL
- DynamoDB
- Redis
- ElasticSearch
- MongoDB

Front End

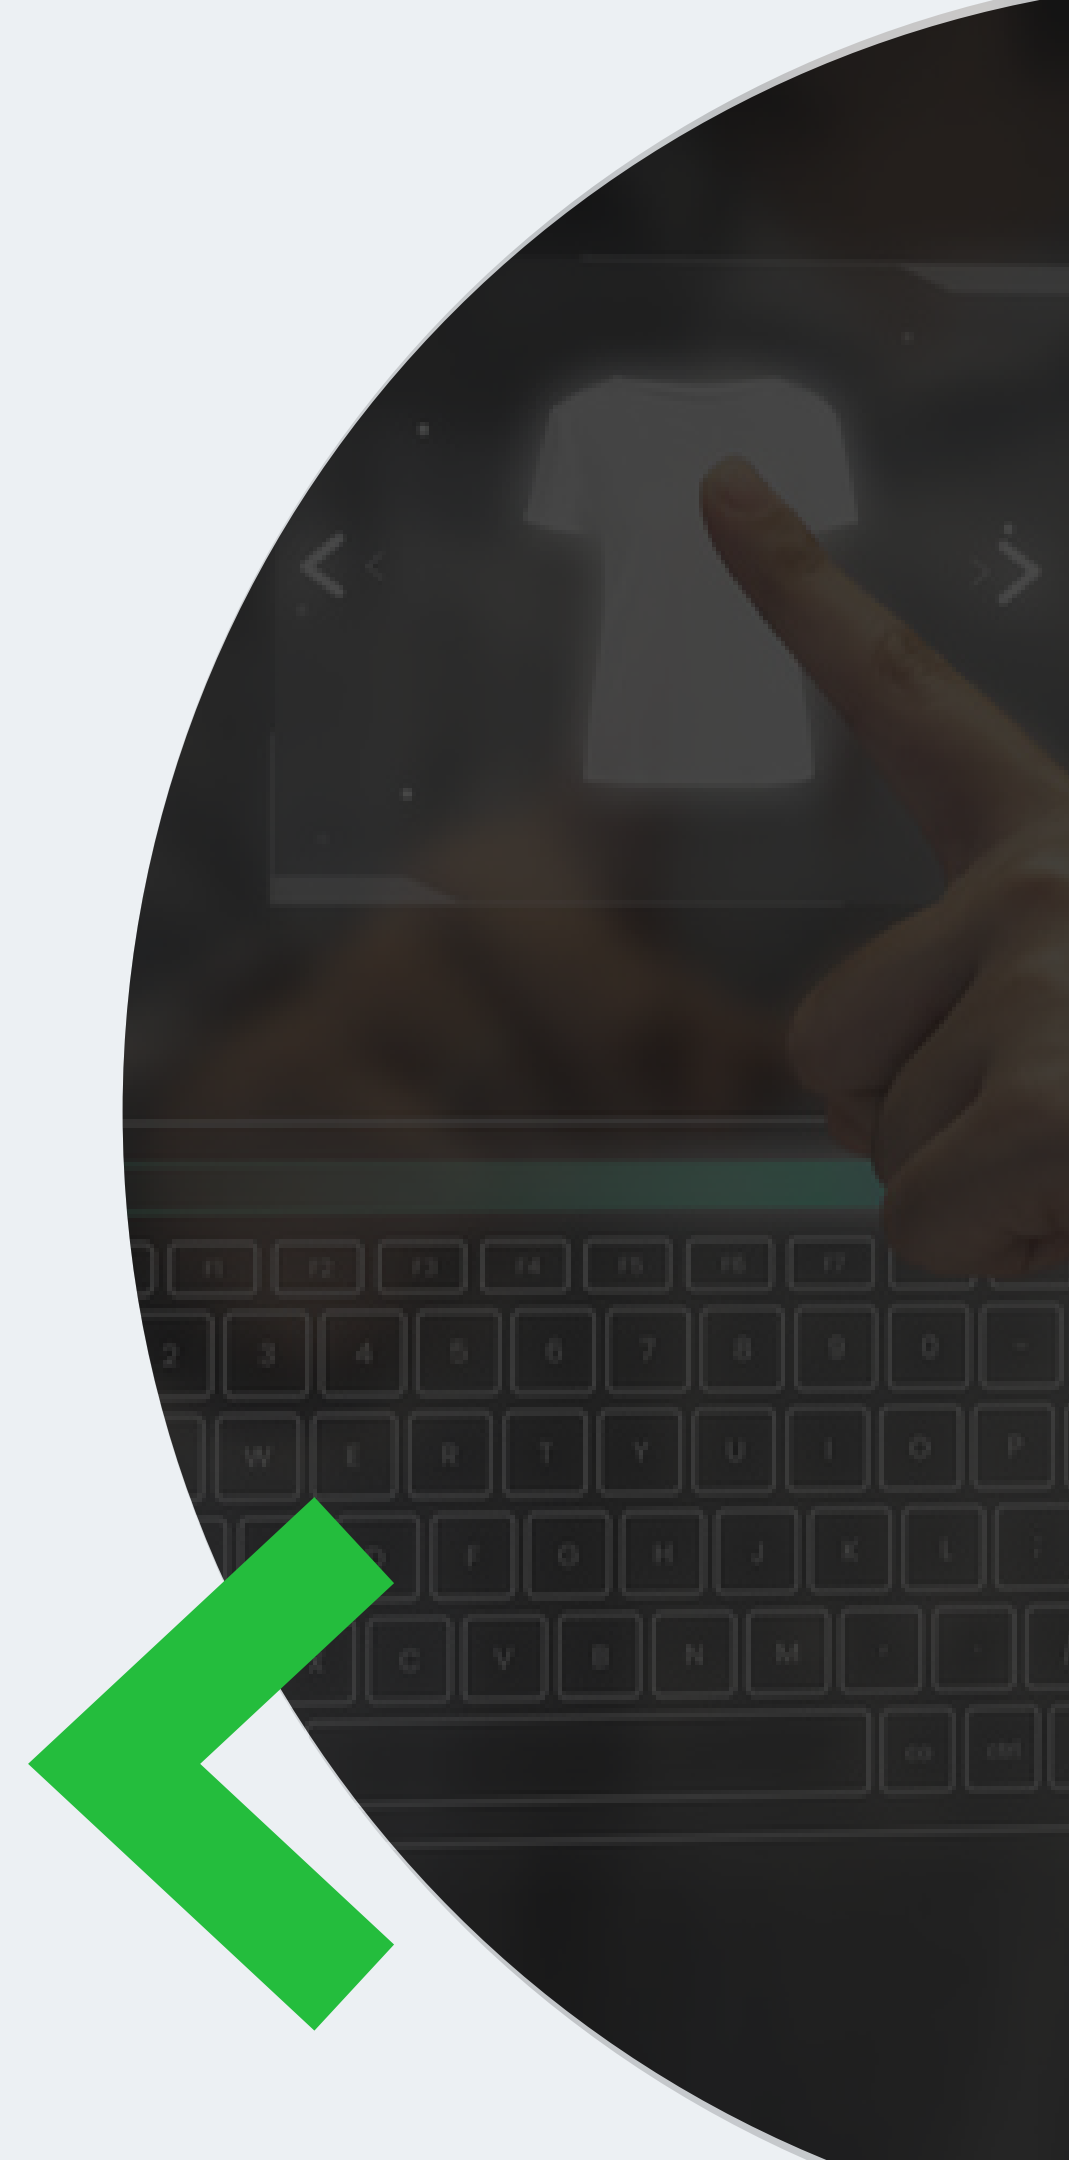

- React
- Typescript
- Angular 2+
- VueJs
- HTML5
- Javascript
- ERB

DevOps

- Git Flow
- AWS
- Google Cloud
- Heroku
- Azure
- NGinx
- Dokku
- Jenkins
- Openshift

Back End

- .Net Core
- C#
- Node
- Ruby on Rails
- Python
- Java
- PHP
- Elixir

Why do customers choose bycoders_

We offer services that include consulting, requirements analysis, custom software development, trials, implementation and post-implementation support. In addition to developing tailor-made integration solutions to satisfy the specific needs of each client.

Team as a service_

BY PARTNERING WITH US, YOU GAIN ACCESS TO A FLEXIBLE
WORKFORCE THAT ADAPTS TO YOUR EVOLVING NEEDS.

Team as a service_

Product or development squad

Whether you require developers, designers, or other skilled professionals, we have a pool of talented individuals ready to work for you.

we hire and managed for you

IT Outsourcing

Hire and efficiently manage talent on demand, with the flexibility of paying per hour.

we hire for you

Talent Matchmaking

Sourcing, screening, and testing the best candidates that have a perfect match with your company.

we help to select and you hire

Product or development squad_

On-demand team with
senior professionals

1. Multidisciplinary professionals ✓
2. Agile software development framework ✓
3. Track deliveries - Weekly ✓
4. Validate delivered sprints ✓
5. All intellectual work developed is 100% yours ✓

IT outsourcing

- Hire contractors part-time or full-time
- All contractors are vetted by us

5. Competency interview report for each candidate

Get access to the best talent

Customer:
KPMG

Sector:
Consultancy

Developed Project:
Whistleblower Channel

Innovation maturity:
High

Tecnologies:

Project date:
2020

Challenge

- Rebuild an outdated platform
- Implement predictive analytics
- Ease of use to enter complaints

Digital Solution

Whistleblowing channel

Software that allows anonymous recording or not of information, and that generates flows of complaints, which by algorithms will be directed to audit committees, including identifying whether the complainant is part of the audit team and, if so, directing to another team to audit.

EMBARCA.AI

Customer:
Embarca.ai

Sector:
Logistic / Technology

Developed Project:
Software MaaS

Innovation maturity:
Mean

Project Date:
2019

Challenge

- Need to improve the multimodal bus ticket purchase experience for users.
- Connecting multiple destinations with multiple companies in an easy and more direct way.

Digital Solution

Digital platform development (web and mobile) leveraged by data, which allows customers and partners to respond quickly, through integration with the systems of the various road transport operators, completely transforming the mobility demand.

+Agility
Best User Experience
+ Profitability

Customer:
INZAG

Sector:
Construction

Developed Project:
CMS App

Innovation maturity:
Mean

Project Date:
2021

Challenge

- Public infrastructure projects often require the expropriation of housing or business infrastructure.
- The lack of communication and information causes demonstrations, blockages and resistance.
- Causes delays in the start of the work

Digital Solution

Development of a CMS (Content Management System) platform to communicate (in real time) the progress of the project, as well as sending documents and integration with a government platform to know when their properties will abandon.

- + transparency
- Blockages
- + Agility at the beginning of the work

Customer:
Instituto Trata

Sector:

Health

Developed Project:
Trata Scan App

Innovation maturity:
Low

Project Date:
2020

Challenge

- Instituto Trata had difficulty in properly evaluating the body movements of its patients and thus advising and indicating or better treatment

Digital Solution

Software development with reading and analysis of movements, collected by videos and images, which allowed through an algorithm, the identification of asymmetries, motor patterns, associated injuries.

- + Quick problem identification
- Reading Errors

Customer:
Nuvemshop

Sector:
Ecommerce

Developed Project:
Mywishlist app

Innovation maturity:
High

Project Date:
2020

Challenge

- Need to get closer to the customer
- Collection of user data from online stores for future purchases
- Allow to understand the consumption habits of customers of virtual stores
- Allow promotions focused on products that customers are interested in.

Digital Solution

Development of a plug-in application, published on the cloudshop e-commerce platform application store. The entire Discovery process was developed, prototyping the screens and user journey, surveying shopkeepers, monitoring user behavior, launching applications, production validation, new versions and application maintenance.

Customer:
Rede Montagens

Sector:
Construction

Developed Project:
Executive Budget
Management Digital
Platform

Innovation maturity:
High

Project date:
2023

Challenge

- They needed to automate and simplify the budget management process
- Improve the integration process between several of management platforms such as:
 - User Management Services
 - Material Management Service
 - Purchasing Management Service
 - Projection Management Service

Digital Solution

We are developing a budget management module to apply simulations and possible construction scenarios.

We haven't finished the project yet, but it's expected to take a year
