

# BOLLARDS

## FIXED

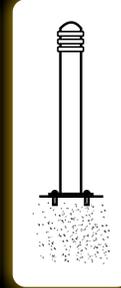

Fixed bollards are solid, immovable posts installed into the ground to control traffic and protect buildings, structures, and pedestrian areas from vehicular intrusion.

## REMOVABLE

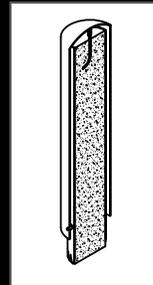

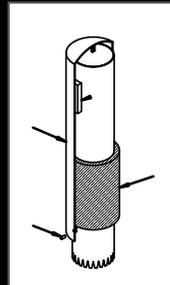

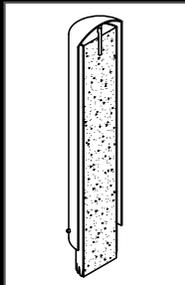

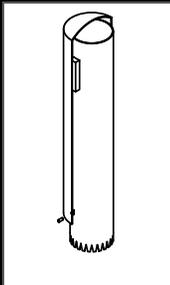

Designed with a hinged plate to ensure pedestrian safety after removal. The removable Bollard can be used along with fixed bollards to create a temporary security barrier for areas requiring restricted vehicles access.

## OPERABLE

Fixed bollards are solid, immovable posts installed over the ground to control traffic and protect buildings, structures, and pedestrian areas from vehicular intrusion.
