

# Who are we?

- RenCod was born from the experience of more than 30 years of working, prospecting and selecting suppliers for the auto parts industry, focusing on quality and product delivery.
- Our objective is to seek partner suppliers to supply the needs of the base industry, transformation industry, consumer goods industry, and all the productive chain, aiming at scale and financial gains for our clients.
- Our job is to seek for your company alternative sources of supply to maintain the sustainability of the business with assured quality and guaranteed delivery.

# About us...

- Wide experience in Procurement, with more than 30 Years working as a buyer, manager and senior manager.
- Strong skills in Supply Chain Management as well as prospection of new suppliers.
- Commercial experience as an Account Manager for GM South America.
- Production expertise acting as a Manufacturing Manager of an Elastomers unit.
- Very good networking in the Industrial Automotive Sector.

# About us...

Marcelo Coda Dell'Aglio

- 36 years experience in the auto parts industry
  - Focus on the bottom line, developing people and leaders
  - Production Manager (foundry, forging, machining, rubber parts manufacturing)
  - Negotiations, DM and IDM purchases

Renato Cirne Lima

- 18 years experience in the auto parts industry
  - Purchasing: 10 years experience; price negotiations; supply chain management; contract administration; DM and IDM
  - Sales: 8 years experience acting as an Account Manager responsible for GM South America and other customers

# Vision

- To be perceived as a reference in the search and development of suppliers within the base and transformation industry.

# Mission

- Offer to the customers suppliers that satisfy their needs, reaching the deadlines, bringing significant gains.
