# OUR FOUNDER

Rent My Tutor was founded on the 14th July 2020, by Kemby Ross-Jones. Her love and passion for technology, education and entrepreneurship is what inspired her to start the company. Wanting to give back to the (female) youth in her community, she dedicated her love into an organization that will provide students with the IT skills needed to succeed in the digital global environment. Her goal is to develop a digital ready generation, equipped with the skills and knowledge needed to pursue a career in Science, Technology, Engineering and Mathematics. # TESTIMONIAL #1

My son has been enrolled with Rent My Tutor for seven months and I am extremely pleased. First of all, Kaedan is not the easiest child to work with as he has an abundance of energy and can be restless. His tutor, Ms Connell, has been nothing but patient with him and looks for ways to keep him engaged during the class. He has received individual attention and continuous encouragement and reinforcement...

...I have seen a distinct improvement in Kaedan's language arts skills and can only credit it to the work he is doing with Ms Connell. I am definitely keeping my son enrolled with Rent My Tutor and plan to add other subjects once I am able to do so.

## TESTIMONIAL #2

Hi, I am Miss Radicker Connell and I have been working at Rent My Tutor Stem Academy aka. RMT for over a year now. I am currently the Senior E-Tutor and I tutor primary school students in Mathematics, English Language, and Literacy. I love empowering kids and there is no better way to do that, than through tutoring. RMT has given me this opportunity to work with kids one-on-one on using technology. As a mother, I understand the need for my child to be educated. As a tutor, I understand that education affects the future of our kids. As both, I know that I have a responsibility to ensure that our kids are educated, motivated, and empowered to become the best version of themselves. The pandemic has taught us that learning is not limited to the classroom. As a result, RMT continues to push online learning within the local market as well as encourage kids to get more involved in STEM Education.
