

**Rethink.**  
management & innovation

# About

---

**The world needs innovators and problem solvers who turn challenges into greater opportunities**

We are a performance-consulting firm specializing in supporting customers in management using good practices with excellence and innovation in order to add value to processes, products and services.

Rethink Management & Innovation has a large experienced team, multidisciplinary, having worked on several projects throughout the world, from the pre-feasibility stage to close out.

Based on this background, we propose to bring value to our customers. We want to solve problems as well as think together.

# Our Ethics

---

**Vision:** To be the largest integrated solutions company in management with global performance and reference in result generation.

We're always looking to deliver practical solutions. Our professionals combine a realistic view of the world with a willingness to explore and create new approaches.

**Mission:** Our mission is “Help organizations build exceptional results by improving their management system”, doing so not only by Change, but by Transformation, creating a sustainable value that makes the real difference.

A Company Like No Other.

**Values:** Honest, excellence, result, integrity and innovation.
