Our Mission Is:

To Unify all dimensions of
the information space by
relentlessly pursuing
innovation and
prioritizing Customer
satisfaction

M-Theory was founded on a unique model of eliminating friction from technology adoption. Our mission is to safeguard information and **amplify productivity** across enterprises, while maintaining an unwavering commitment to be of service.

Who are we?

We're supporters, protectors, and providers. Our job is to consult, deploy, and manage IT services that support all student's technical learning needs so you can focus on making education accessible. We equip schools with the tools that empower students, educators, and IT admins for flexible and collaborative e-learning experiences.

The Tech

Cloud-derived	————	Includes file sharing, backups, calendars, firewalls, protection
Operates on and offline	—————	Local area Networks, Wide Area Networks
Quick response team	—————	Remote and Onsite response time SLAs
Analysis and Optimization	—————	Amplify education and collaboration
Microsoft Partner	—————	Microsoft 365 with Enhanced Security
SLED Vendor	—————	E-Rate, LAUSD, USAC, GSA, Cal Pro, Fed

GOOD TECHNOLOGY LOOKS WHERE OTHERS DON'T

Cost-effective

Our monthly subscription plan you have endless exposure to our holistic managed IT and security services.

Annihilates Threat

We detect, investigate, and respond to security threats to your cloud infrastructure through syndicated silos for speed and accuracy.

Complete Solution

Our centralized platform makes your management and info systems easily accessible 24/365.

Setting Expectations

Accelerate Learning

Get insights with actionable intelligence so educators and students can track progress and take action.

Inclusively Designed

Build digital learning solutions that promote equity for students with diverse abilities and backgrounds.

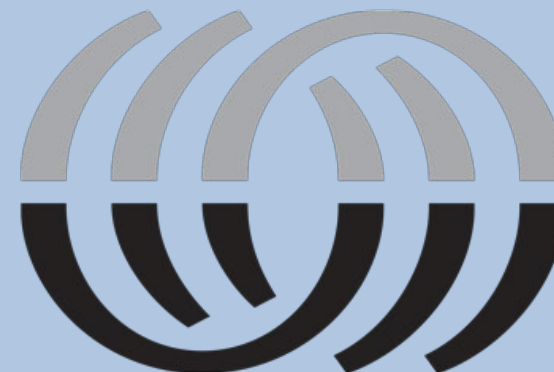

Support Well-being

Leverage tools that cultivate student social skills and nurture a positive learning environment - even online.

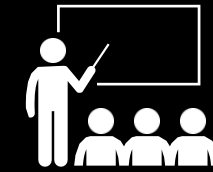

Trusted and Secure

Always-on security to detect and block malware and defend students from unsafe content.

Why M-Theory Group?

We were kids once too. But we will forever be students. We're constantly learning, evolving, and bettering ourselves so we can help your staff and students do the same.

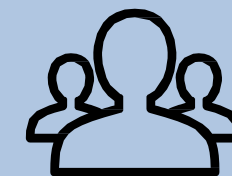

OPTIMIZING CLASSROOMS

We provide the state-of-the-art tools and software to teach children in the best ways possible. We provide teachers with the latest technology and teach them how to maximize the learning experiences of their students.

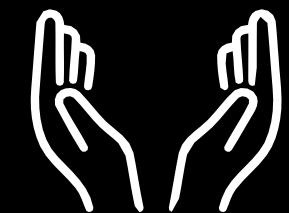

PROTECTING STUDENTS

Our security-first strategy puts protection at the forefront. We determine your network health and the effectiveness of your defense systems with regular compliance testing, to avoid hacks, decrease downtime, and prevent potential data loss.

USER-FRIENDLY

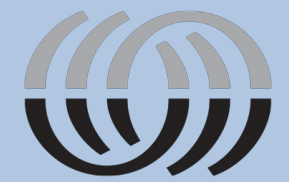

We decrease the friction between tech and teaching to avoid unnecessary distractions and obstacles in the classroom. Tech is your friend, not your foe, and we ensure it propels the learning environment.

24/365 HELPING HANDS

Without any extra costs for setup, configuration, maintenance, repairs, or replacements, we also offer 24/7 tech support to your staff.

//services

MANAGED IT SERVICES

Our managed IT services let us monitor, manage, and secure your network so you can focus on what you do best. We view your network as a holistic system that relies on each part as integral to the whole.

This is why we focus on the functionality and success of each variable when strategizing your infrastructure to reach our goal of 0% downtime.

MANAGES SECURITY SERVICES

Our 24/7 NOC protects your school from international, internal, and external risks with state-of-the-art cybersecurity tools.

Our compliance team prevents and protects against viruses and threats to your school's networks so your teachers and students can be sure that their systems are safe.

LEARNING SERVICES

With Learning Accelerators, educators have access to data and insights for individual students, multiple classrooms, and entire schools.

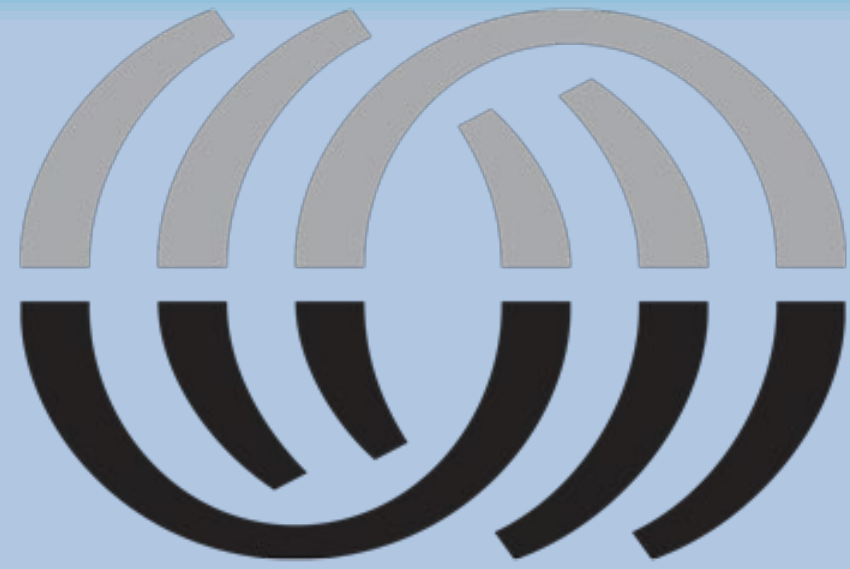

Education Insights for teachers provides a clearer picture of student activity across multiple classrooms. Track assignment turn-in and classroom engagement. See trends that help students and save time.

NETWORK SERVICES

We provide robust network infrastructure and Managed Access Control.

Secure and managed wireless networks and remote access networks ensure and promote enhanced and secure productivity.

Content Management minimizes student distraction and increases focus and engagement.

Microsoft Office 365

Share and manage documents,
calendars, and tasks across
campus. Anytime. Anywhere.

Get the right applications

EVERY CLASSROOM NEEDS

Get the fully installed and latest versions of Excel, Word, PowerPoint and Outlook, and OneNote for Windows or Mac. We'll always update for the latest features, tools, security updates, and bug fixes.

Install on PCs, Macs, and tablets

AND SECURE FROM VULNERABILITIES

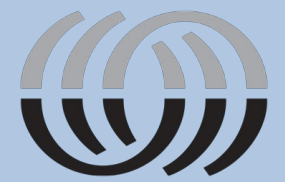

Get all your data synced and accessed anytime, anywhere, on any device.

Technical support

TO PREVENT AND OVERCOME TECHNICAL
DIFFICULTIES

At no extra cost, we help you prevent and fix technical issues, guide you through emergencies, or offer any other type of customer support.

//tech stack

APPLE SCHOOL MANAGER

Apple School Manager is a web-based portal for IT administrators that provides a fast, streamlined, and remote way for you to deploy Apple devices in your school.

MICROSOFT EDUCATION

Learning Accelerators: tools for students
Microsoft 365 solutions for education can help students catch up, keep up, and get ahead..

MOSYLE

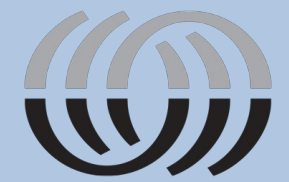

We use Mosyle to fully integrates 6 different applications on a single Apple-only platform to allow your school to easily and automatically deploy, manage & protect all their Apple devices.

EDUCATIONAL SOFTWARE

Hapara
Imagine Learning
Khan Academy
Naviance
Performance Matter
PowerSchools
Schoolage
Stemscope
Thinkcentral
Collage board
CAAspp testing

//security software

CROWDSTRIKE

Crowdstrike looks for malicious attacks before they happen. It feeds AI machines to recognize code in the malicious AI world for vast vigilance

MBRANE

With Brane, you can track data movement within your company and document behaviors to recognize breaches and alert our SOC team to report anomalies and correlated activities.

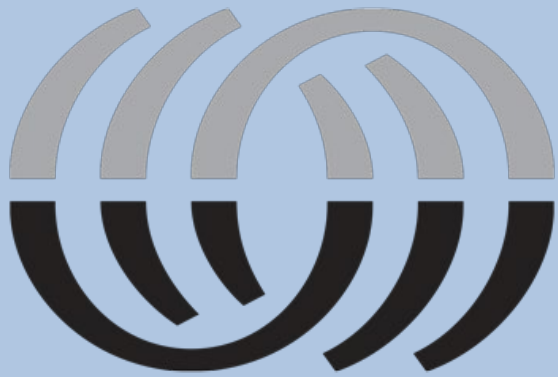

JUNIPER

Juniper Mist was built for reliability, security, and flexibility, and runs many of the world's most sophisticated network deployments. It's one of the things that give our operators an advantage over those who run competing network operating systems.

RECON:RED

RECON:RED employs continuous vulnerability management and advanced collection of target SLED information to attempt to identify any and all security misconfigurations and vulnerabilities within the customer's external environment.

MTG can support your compliance requirements through the following services:

- Process Creation
- Policy Creation
- Compliance programs based on your requirements
- Audit and Assessments
- Risk Program Creation and Management"

Leaders |

We've seen the industry pivot through paradigm shifts and cultural reformations. When navigating through these, we've learned that technology is a connected experience. Our tailored IT solutions put our customers in the center of it for intelligent, resilient, and responsible interfaces. We have pioneered the advent of the subscription economy by applying it to SaaS-based cloud solutions to give companies the exact services they need.

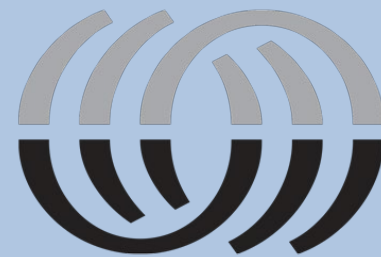

Our Culture

| Doers

We believe technological experiences depend on human ones. We approach technology as a digital solution to human problems, which is why our customers are our greatest asset. Our culture operates on the single notion that any form of technology that requires user interaction requires a sense of human instinct. This gives us the leverage to deliver dynamic technology in a world that continues to migrate online. The future of interfacing will see further than the human eye, which is why human connections inspire our digital ones. We empower our customers, employees, and family by making them the focus of our technologies. That's why we believe doing right by our offline communities only strengthens our online ones.
