Company description

Software development and technological solutions company. We have developed the technological platform "BlackID Card", which has allowed us to implement solutions to control processes in the automotive, aeronautical, sports, dental clinics, services and soon in restaurants and bars industries.

Service offered

- **Fast Track.** Unique database with specific and classified information, through the ID Card on employees, clients and suppliers integrated into the specific process.
- **Specific customization.** We have more than 20 modules to solve specific processes, functions that lead to action and business control panels.
- **Large projects.** We can develop and implement IT projects according to the needs of clients (Talent training, certification of engineers and full stack developers).

Featured Clients

INDEREQ (Instituto del deporte y recreación del Estado de Querétaro)	BlackID Card for the control of High Performance Athletes and activities within the sports center
PIONEROS DE QUERÉTARO (American Football Team)	BlackID Card. For the control of sporting events inside the Stadiums and registration of player activities
SUNNU (Latam Dental Clinics)	Sistema para llevar la administración de más de 300 clínicas en 5 países
INDUSTRIES AUTOMOTIVE, AERONAUTICAL, MANUFACTURING	CNH, AIRBUS, TECHOPS, ECOBASA, CARTOGRAPH, AMIQRO,...

We are interested

Add our capabilities to the IT departments of companies, to develop remote projects and also offer the development IT Talent required by companies (Students, Technicians, Engineers and Full Stacks)

Relationship
